

## **Metaplast Launches 2.5L Light Bucket with Tamper-Evident Lid for Secure Food and Industrial Packaging**

Durable, lightweight, and recyclable plastic bucket designed for food, chemical, paint, and industrial applications across the UK.

manufacturer, is pleased to announce the availability of its **2.5L Light Bucket with Tamper-Evident Lid and Plastic Handle**, designed to provide secure, reliable, and cost-effective packaging solutions for a wide range of industries.

Manufactured using high-quality recyclable polypropylene, the 2.5-litre bucket features a tamper-evident lid that helps ensure product integrity throughout storage, transportation, and retail distribution. The lightweight construction reduces material usage while maintaining excellent durability and performance.

The bucket is suitable for food products, paints, coatings, chemicals, adhesives, powders, and other industrial applications requiring dependable packaging. Its ergonomic plastic handle allows for convenient carrying and handling, while the secure closure system helps prevent accidental opening.

Key features include:

- 2.5-litre capacity
- Tamper-evident lid for enhanced product security
- Durable polypropylene construction
- Lightweight design for efficient transportation
- Recyclable material supporting sustainability initiatives
- Comfortable plastic carrying handle
- Suitable for food and industrial applications

Metaplast continues to invest in innovative plastic packaging solutions that combine product protection, functionality, and environmental responsibility. The company serves customers across multiple sectors with a comprehensive range of injection-moulded plastic containers, buckets, tubs, and custom packaging products.
