

# NeuralNetworki.ng Grounds Its AI Services in Applied Research and System Reliability

The Faridabad-based firm pairs hands-on engineering with research into how AI systems behave and fail, building agents and forecasting tools clients can actually trust.

**Faridabad, Haryana Jun 7, 2026 ([IssueWire.com](https://www.issuewire.com))** - Neural Networking Systems Research Labs (OPC) Pvt. Ltd., operating under the brand NeuralNetworki.ng, is building its artificial intelligence services on a research-informed view of how AI systems actually behave in the real world.

The Faridabad-based firm argues that reliable AI depends less on chasing the newest model and more on understanding how systems fail, drift, or behave unpredictably once deployed. That understanding shapes how it builds. Its custom AI agents use a multi-provider, framework-free approach, keeping the underlying logic transparent and avoiding lock-in to any single vendor, so clients can reason about, adjust, and own what they run.

The same rigour applies to its demand forecasting engines, which model unconstrained demand, decompose promotional lift, account for SKU lifecycle stages, and capture substitution and cannibalisation effects between products. For sectors such as fast-moving consumer goods, this depth is what separates a forecast that informs planning from one that quietly misleads it.

Alongside client delivery, NeuralNetworki.ng develops applied machine learning and natural language

processing solutions, and runs AI training programmes for schools, enterprises, and professional cohorts, carrying the same emphasis on genuine understanding into how it teaches.

"Most businesses do not need another AI product. They need systems that actually work in their environment, and the understanding to use them well," said Samnit Mehandiratta, Founder and CEO. "We care as much about how a system fails as how it performs, because that is what determines whether a client can rely on it."

Neural Networking Systems Research Labs is a registered private company (CIN: U62013HR2025OPC138455) based in Faridabad, Haryana, India.

About NeuralNetworki.ng

NeuralNetworki.ng is an AI services company based in Faridabad, Haryana, India, delivering custom AI agents, demand forecasting engines, applied machine learning, and AI education for clients across industry, education, and the public sector. For more information, visit [neuralnetworki.ng](https://neuralnetworki.ng).
