

## Newark Dentists Highlight Early Care for Dental Implants, Gum Disease, and Tooth Loss

Multi-specialty practice highlights the importance of timely treatment for common dental conditions affecting adults and families throughout Newark.

**Newark, New Jersey Jun 11, 2026** ([Issuewire.com](http://www.Issuewire.com)) - Delaying treatment for dental problems can often turn manageable conditions into more complex health concerns. From untreated gum disease and missing teeth to dental infections and bite problems, many patients postpone care until symptoms interfere with daily life, creating challenges that may require more extensive treatment later.

As part of a feature examining access to comprehensive dental care in Newark's Ironbound community, journalist Melisa S. Pruitt highlights how local residents are seeking convenient solutions that allow them to address preventive, restorative, cosmetic, and specialty dental needs in one location. The report focuses on Gentle Dental of NJ, a multi-specialty dental practice serving families in Newark with a coordinated approach to oral healthcare.

According to Dr. Eugene Bernstein, DDS, General and Cosmetic Dentist, early intervention remains one of the most effective ways to protect long-term oral health. Dr. Bernstein earned his DDS from NYU College of Dentistry in 1998 and completed Oral Surgery and General Practice Residency training through the NYU School of Medicine at Bellevue and Tisch Hospitals in 1999. With more than 25 years of experience, he has served as a faculty member in NYU's Division of Restorative and Prosthodontic Sciences and as a Clinical Assistant Attending at Bellevue Hospital. He is also a member of the American Dental Association, Academy of Implant Dentistry, and North East Regional Board of Dentistry.

*"Many dental conditions become more difficult to treat when patients wait too long to seek care," said Dr. Bernstein. "Our goal is to help people understand their options early, preserve natural teeth whenever possible, and provide treatment that supports both oral health and confidence. Every patient deserves care that is precise, comfortable, and tailored to their individual needs."*

Gentle Dental of NJ provides preventive dentistry, cosmetic dentistry, teeth whitening, orthodontics, Invisalign, braces, dental implants, root canal therapy, periodontal treatment, crowns, laminates, fillings, and advanced diagnostic imaging. The practice's multi-specialty team includes Dr. Olga Mishilevski, DDS, General Dentist; Dr. Ilya Lipkin, DDS, Board-Certified Orthodontist; Dr. Mariya Rozenblum, DDS, Endodontist; and Dr. Mark Pakan, DDS, Periodontist. The office utilizes digital X-rays, 3D imaging technology, and modern treatment techniques while offering services in English, Spanish, and Portuguese. Patients also benefit from extended weekday evening hours, Saturday appointments, and convenient access near Newark Penn Station.

The feature examines how coordinated specialty care can help patients address oral health concerns before they progress and explores the role of modern dental technology in improving treatment planning, comfort, and outcomes for Newark-area families.
