

Stair Creations Expands Hardwood Flooring Services Across Fairfax and Alexandria

Expanded flooring services include hardwood floor installation, hardwood refinishing, and vinyl plank flooring for Fairfax and Alexandria homeowners planning stair and railing updates.

Fairfax, Virginia Jun 14, 2026 ([IssueWire.com](https://www.issuewire.com)) - Stair Creations, a locally owned stair and railing contractor serving Northern Virginia, is expanding its [hardwood flooring services](#) across Fairfax, Alexandria, and nearby communities. The expansion gives homeowners a clearer path to coordinate hardwood floor installation, hardwood floor refinishing, and vinyl plank flooring installation alongside stair and railing projects.

Led by Carlos DeAnda and Alice Sanchez, Stair Creations began with stair and railing installation and has grown into a full-service contractor for stair design, stair railing installation, stair railing replacement, hardwood stair installation, stair refinishing, hardwood floor installation, hardwood floor refinishing, and vinyl plank flooring installation. A future company update will share more about the Stair Creations & Flooring name and how it fits with the company's broader stair, railing, and flooring direction.

The expanded flooring focus reflects a common need among Northern Virginia homeowners. Many stair and railing projects begin because a homeowner is already updating floors, refinishing hardwood, or trying to make older stairs match the rest of the home. Stair Creations helps clients coordinate wood species, stain colors, railing styles, and finish details so the completed project feels consistent.

"One of my goals was to bring the floor and stain division in-house because homeowners in our area were frustrated having to manage a floor team, a rail team, and a painter," said Alice Sanchez. "We saw

that as a problem we could solve. We're known for stairs and rails in our area, and now we want homeowners to know us for floors, too."

Stair Creations has completed more than 800 railing projects and 400 hardwood stair installations for homeowners, builders, and contractors throughout Fairfax, Alexandria, Arlington, McLean, Falls Church, and surrounding communities.

The company's flooring services focus on hardwood and wood-look flooring rather than carpet or broad general flooring. Stair Creations works with homeowners on hardwood floor installation, hardwood floor refinishing, vinyl plank flooring installation, stain selection, and finish planning that connects the stairs, railings, and floors.

For homeowners planning a larger interior update, the added flooring focus can help simplify early decisions about scope, materials, and finish direction. Instead of treating the stairs and floors as separate projects, Stair Creations helps clients review how the staircase, landings, railings, and surrounding hardwood areas should work together before installation or refinishing begins.

The expanded flooring work is also designed for homeowners who want a more specialized contractor rather than a general flooring provider. Stair Creations does not focus on carpet installation or broad flooring categories. The company keeps its work centered on hardwood, refinishing, stair systems, railings, and wood-look flooring products that fit naturally with the homes and remodeling projects it already serves.

Stair Creations also offers 3D renderings on select stair projects, helping homeowners visualize design options before installation begins. A showroom experience is also in development to give clients a place to review samples, compare materials, and make more confident project decisions.

With the expanded flooring services, Stair Creations is positioning itself as a trusted contractor for homeowners who want stairs, railings, and hardwood floors handled by one coordinated team across Fairfax, Alexandria, and Northern Virginia.
