

## Syosset Dentist Dr. Tim Mozner Highlights Advances in Dental Implants and Restorative Dentistry

Experienced Long Island dentist discusses modern implant technology, patient-centered treatment, and comprehensive restorative dental care.

**New York City, New York Jun 11, 2026 ([Issuewire.com](http://Issuewire.com))** - Tooth loss, untreated dental damage, and delayed oral healthcare continue to impact adults throughout Long Island, affecting everything from daily comfort and nutrition to confidence and overall well-being. As more patients seek long-term solutions for missing or damaged teeth, dental professionals are emphasizing the role of modern technology and individualized treatment planning in achieving successful outcomes.

In a feature examining advancements in restorative dentistry and dental implant treatment across Nassau County, journalist Amy P. Hodges highlights the clinical approach of Creative Dental of Syosset and its founder, Dr. Tim Mozner, DDS. Serving patients throughout Syosset, Oyster Bay, Plainview, and neighboring communities, the practice focuses on comprehensive dental care ranging from preventive services to advanced implant procedures.

Dr. Timur "Tim" Mozner, DDS, brings more than two decades of clinical experience to his work in restorative and cosmetic dentistry. He earned his Doctor of Dental Surgery degree from SUNY Stony Brook School of Dental Medicine in 1998 before completing his residency training through New York University's Advanced Education in General Dentistry program in 1999. In 2020, he served as Main Clinical Supervising Faculty at NYU Dental School, teaching dental students in endodontics, prosthodontics, and implant dentistry. Throughout his career, Dr. Mozner has placed approximately 3,000 dental implants with a documented success rate of 96 percent and has completed advanced implant training through both NOBEL and MIS certification programs. He was recognized among America's Best Dentists in 2015, 2017, and 2021.

"We believe patients deserve dentistry that combines advanced technology with compassion and personalized attention," said Dr. Mozner. "Whether someone needs a single implant, a full-mouth restoration, or treatment for a dental emergency, our goal is to provide care that is comfortable, predictable, and focused on long-term oral health. Modern technology allows us to plan treatment more accurately while helping patients feel more confident throughout the process."

Creative Dental of Syosset provides dental implants, Invisalign, veneers, cosmetic dentistry, restorative dentistry, pediatric dentistry, emergency dental care, root canals, crowns, bridges, teeth whitening, and preventive services. The office utilizes CBCT imaging, digital scanning technology, panoramic imaging, digital radiography, and other advanced diagnostic tools to support treatment planning and patient care. The feature examines how advancements in dental implant planning, digital imaging, and restorative treatment are helping improve patient experiences and clinical outcomes throughout Long Island.
