San Diego, California Jun 10, 2026 (Issuewire.com) - The AEC industry is changing with the use of computers. Working with people from other countries. Companies from countries are helping architecture, engineering, and construction firms around the world.

At the AIA Conference on Architecture and Design 2026, people are talking about more than software and materials. They are also talking about companies from countries that are good at making detailed computer models, drawing designs, turning scans into models, and doing engineering work for things like heating and cooling systems.

These companies are helping firms save money and finish projects faster. Do more work without too much trouble.

Here is a **list of the AEC service companies** from other countries that you should meet at the AIA Conference, on Architecture and Design 2026:

1. Pinnacle Infotech

Pinnacle Infotech is a name in the world of BIM and detailing services. They are really good at handling projects all over the world. Pinnacle Infotech does everything from start to finish, including finding problems and working with electrical and plumbing systems. This makes Pinnacle Infotech a great partner for construction companies.

2. Pangulf technologies

Pangulf Technologies is a growing offshore AEC service provider specializing in BIM modeling, architectural drafting, and engineering design support. With a focus on quality, precision, and timely delivery, the company supports global clients across residential, commercial, and infrastructure projects. Their expertise in BIM workflows, CAD documentation, and multidisciplinary coordination makes them a reliable partner for firms looking to enhance project efficiency through outsourcing.

3. Camellia Buildtech

Camellia Buildtech is rapidly emerging as a **trusted outsourcing partner** for AEC firms seeking precision, scalability, and fast turnaround.

Specializing in:

- *BIM Modeling*
- *Scan-to-BIM Conversion*
- *CAD Drafting*
- [CAD to BIM Conversion](#)
- *Shop Drawings*
- *Construction Documentation*

Camellia Buildtech helps clients streamline workflows, reduce project risks, and improve coordination across disciplines.

The company is really good at working with point clouds and creating BIM models. This helps people make decisions when they are working on big renovation or infrastructure projects.

Camellia Buildtech is another company that people trust. They are good at Scan-to-BIM, [architectural services](#), and BIM outsourcing services. As more and more people need these services, Camellia Buildtech stands out because they do work and get it done quickly.

4. Silicon Valley Infomedia

Known for a wide range of services, including architectural drafting, BIM services, and MEP engineering, Silicon Valley Infomedia offers scalable outsourcing solutions tailored to global AEC firms.

5. United-BIM Inc.

United-BIM provides BIM modeling, coordination, and construction documentation services. They are experts in the residential and infrastructure sectors. This makes United-BIM a strong partner for projects that involve different areas.

6. Vegacadd

Vegacadd is an established firm that offers CAD drafting, 3D modeling, BIM services, and structural detailing. They have experience working in markets. This experience makes Vegacadd a reliable partner.

7. Offshore Outsourcing India

This firm is good at drafting, 3D visualization, and BIM modeling. They provide solutions that are easy on the wallet. They focus on quality. Getting things done on time.

8. Excelize Services

Excelize Services offers engineering and BIM solutions. Their services include structural and architectural areas. They have an approach. This approach helps them execute projects smoothly. Excelize Services provides BIM solutions.

9. PreciCAD

PreciCAD is known for CAD drafting, BIM conversion, and detailing services. They focus on being precise and accurate. This makes PreciCAD a good partner for projects that require design.

10. Cad Crowd

Cad Crowd connects businesses with CAD designers, BIM specialists, and engineering professionals from around the world. They offer outsourcing solutions. These solutions cover different areas.

Why Offshore AEC Companies Are Gaining Demand

With increasing project complexity and tighter timelines, AEC firms are turning to offshore partners for:

- * Cost efficiency without compromising quality
- * Access to skilled BIM and CAD professionals
- * Faster project turnaround
- * 24/7 workflow cycles
- * Scalable project support

Services like Scan-to-BIM and point cloud modeling are really needed now. People also want CAD-to-BIM conversion and MEP coordination. This is because digital construction is becoming the standard in

the industry.

Final Thoughts

The AIA 2026 is not about new ideas for design and materials. It is also about working with the people.

Companies like [Camellia Buildtech](#), Pinnacle Infotech, and Pangulf Technologies are changing how projects are done around the world. They do this with outsourcing solutions that use technology and are efficient.

For AEC firms that want to stay competitive and have project outcomes, working with these offshore service providers can be a big help. AEC firms can improve their projects. Use digital workflows by connecting with service providers such as Camellia Buildtech, Pinnacle Infotech, and Pangulf Technologies.
