

BAARI by Kanishk Strengthens Its Position Among Delhi's Leading Aluminium Window and Door Manufacturers

Jodhpur-based systems brand expands its footprint in Delhi with engineered aluminium solutions built for modern architecture

Aluminium Door Manufacturers

Jodhpur, Rajasthan Jul 25, 2026 ([Issuewire.com](https://www.issuewire.com)) - BAARI by Kanishk, a brand of Kanishk Aluminium India Limited, continues to strengthen its reputation as one of the [best aluminium windows brands in Delhi](#), backed by end-to-end manufacturing control and a growing presence across the capital's residential and commercial construction sector.

Unlike fabricators who assemble parts sourced from multiple vendors, BAARI designs and manufactures its own extrusion profiles in-house at its Jodhpur facility. This gives the brand direct control over structural precision, hardware integration, and long-term durability, factors that have positioned it among the trusted [aluminium door manufacturers](#) serving architects, developers, and homeowners across North India.

The brand's Delhi presence includes an Experience Centre in Kirti Nagar, where architects and homeowners can examine BAARI's window and door systems firsthand. The range spans slim-frame sliding windows, tilt and turn systems, lift and slide doors, and casement windows, all engineered for

large openings, minimal sightlines, and consistent performance across India's varied climate conditions.

"Our approach has always been to treat window and door systems as engineering products, not just architectural fittings," said a company spokesperson. "Every profile we manufacture goes through the same discipline, from extrusion to hardware integration, which is why our systems perform consistently whether they're installed in a Rajasthan summer or a Delhi monsoon."

BAARI's systems are built to support double glazing for improved thermal performance, advanced sealing for noise and dust resistance, and hardware rated for repeated daily use. With over 50,000 installations delivered and more than two decades of manufacturing experience, the brand has built a client base that includes private residences, resort villas, and high-rise developments.

The company's growth in Delhi reflects a broader shift in the city's premium construction market, where architects and developers are increasingly specifying systemised aluminium solutions over conventional fabrication. BAARI's controlled manufacturing process, combined with its regional service network, has made it a preferred choice for projects that demand both design flexibility and structural reliability.

BAARI by Kanishk continues to expand its network of fabricators and service providers across Delhi NCR, supporting projects from initial design consultation through installation and after-sales service.

About BAARI by Kanishk

BAARI by Kanishk is a brand of Kanishk Aluminium India Limited, Jodhpur, an integrated manufacturer of aluminium system doors and windows. With in-house extrusion, design, and manufacturing capabilities, BAARI delivers architectural-grade aluminium solutions for residential and commercial spaces across India.
