

BBOX to Showcase Advanced Aluminium Enclosure Solutions at Automation Expo 2026

BBOX will demonstrate its manufacturing expertise through precision aluminium die cast enclosures and customized solutions, including CNC machining, powder coating and application-specific modifications.

Mumbai, Maharashtra Jul 14, 2026 ([Issuewire.com](https://www.issuewire.com)) - As manufacturers worldwide accelerate investments in digital transformation, AI, industrial automation and smart manufacturing, the need for reliable electronic protection solutions is becoming increasingly important. Against this backdrop, [BBOX](#)

[Enclosures](#) has announced its participation in Automation Expo 2026, one of Asia's leading automation and industrial technology exhibitions, scheduled to take place from July 22 to 25 at the Bombay Exhibition Centre (BEC), Mumbai.

This year's theme, ***"The Shape of Things to Come,"*** reflects the industry's growing focus on digital and AI-led transformation, sustainability in automation, cybersecurity in smart factories, and scalable solutions designed to improve global competitiveness.

The rapid adoption of Industry 4.0 technologies is reshaping factories across the world. From intelligent control systems and industrial IoT devices to robotics, connected machinery and advanced process automation, manufacturers are increasingly relying on sophisticated electronics to improve efficiency, productivity and operational visibility.

As these systems become more connected and mission-critical, protecting sensitive electronics from harsh industrial environments has become a growing challenge. Factors such as dust, moisture, vibration, corrosion and temperature fluctuations can significantly impact equipment performance and reliability, making enclosure selection an increasingly important consideration during product development.

Backed by the manufacturing expertise of [Demo Casters Private Limited](#), a pioneer in aluminum pressure die casting since 1952, BBOX serves customers across domestic and international markets namely Germany, France, Netherlands, Australia, USA, UAE, and many more. The company believes that as automation technologies continue to evolve, enclosure solutions will play a more critical role in supporting equipment reliability, safety and long-term operational performance.

"At BBOX, we believe growth comes through total customer satisfaction. Automation Expo provides an excellent opportunity to connect with OEMs, system integrators and industry professionals while showcasing enclosure solutions that support long-term performance and reliability." said **Vinay Bijlani, Managing Director, BBOX Enclosures.**

Visitors to Automation Expo 2026 can meet the BBOX team at **Hall 06, Stand R14**, to explore its range of precision aluminum enclosures and [customization capabilities](#), including CNC machining, precision cut-outs, powder coating and application-specific modifications for a wide range of industrial and OEM applications.

About BBOX Enclosures

BBOX Enclosures, a brand of Demo Casters Private Limited, specializes in precision aluminum die-cast [enclosures](#) and customized enclosure solutions for industrial automation, electronics, instrumentation, telecommunications, renewable energy and OEM applications. Backed by more than 70 years of aluminum pressure die-casting expertise, BBOX serves customers across domestic and international markets with a focus on quality, customization and customer satisfaction.
