

Celebrating 250 Years: Dex System Unveils Ultimate Literary Roadmap to America's Semiquincentennial

AI-powered publishing imprint AM I AM launches a year-long series spotlighting its catalog alongside the nation's 250th birthday

New York City, New York Jul 1, 2026 (Issuewire.com) - As the United States counts down to its Semiquincentennial, Dex System, the AI-powered creative engine behind the AM I AM publishing banner, announces a sweeping year-long press campaign connecting its growing catalog of authors and titles to America's 250-year story. From historical drama to speculative fiction, Dex System's books will be featured across 19 themed releases running from January through year's end.

Dex System uses artificial intelligence as a core creative tool — generating manuscripts, refining prose, and helping authors bring ambitious stories to life faster than traditional publishing allows. This anniversary series is designed to introduce readers, media, and booksellers to that catalog while the nation reflects on 250 years of history.
