to Strengthen Cybersecurity Across India

- One Agent. One Dashboard.
- Stronger Security for India
- Empowering Partners. Protecting Businesses.

Delivering a Unified Cybersecurity Platform for Businesses, MSPs, and Channel Partners Across India and the SAARC Region.

- Endpoint Detection & Response (EDR)
- Managed Detection & Response (MDR)
- SIEM
- SOAR
- SASE
- GRC

- Enterprise-Grade Security Simplified.
- Advanced Threat Detection. Faster Response.
- Lower Complexity. Higher Resilience.
- Stronger Together for a Safer Digital Future.

Coimbatore, Tamil Nadu Jul 8, 2026 ([IssueWire.com](https://www.issuewire.com)) - CyboSec Partners with Todyl to Bring a Leading Unified Security Platform to India and the SAARC Region

CyboSec Technologies Private Limited today announced its strategic partnership with **Todyl**, bringing its [unified cybersecurity platform](#) to customers and channel partners across India and the SAARC region. Through this partnership, CyboSec will deliver enterprise-grade cybersecurity solutions designed to help organisations simplify security operations while protecting against today's evolving cyber threats.

As digital transformation accelerates across businesses of all sizes, organisations require security solutions that are easy to deploy, centrally managed, and capable of protecting users, endpoints, networks, and cloud environments from a single platform.

One Agent. One Dashboard. Complete Cybersecurity.

The [Todyl](#) platform enables organisations to manage multiple cybersecurity capabilities through a single

lightweight agent and a unified cloud-based dashboard, reducing complexity while strengthening cyber resilience.

The Platform Delivers:

- Endpoint Detection & Response (EDR)
- Managed Detection & Response (MDR)
- Security Information & Event Management (SIEM)
- Security Orchestration, Automation & Response (SOAR)
- Secure Access Service Edge (SASE)
- Governance, Risk & Compliance (GRC)

This unified approach helps organizations reduce operational overhead, strengthen security posture, improve threat visibility, automate security operations, and accelerate incident response.

Empowering India's SME Market

Small and medium-sized enterprises (SMEs) face increasingly sophisticated cyber threats while often lacking dedicated security teams. Through this partnership, **CyboSec** aims to make enterprise-grade cybersecurity more accessible by providing simplified deployment, centralized management, and managed security services.

Businesses can benefit from:

- Faster deployment with a single agent
- Centralized visibility through one dashboard
- AI-driven threat detection and response
- Ransomware and malware protection
- Secure remote access for hybrid workforces
- Automated incident response workflows
- Improved compliance and security posture
- Reduced infrastructure complexity and operating costs

Building a Strong Channel Ecosystem

As part of its India and SAARC expansion strategy, CyboSec is actively recruiting:

- Managed Security Service Providers (MSSPs)

- [Managed Service Providers \(MSPs\)](#)
- Value Added Resellers (VARs)
- System Integrators
- Internet Service Providers (ISPs)
- Cloud Solution Providers
- IT Infrastructure Partners
- Cybersecurity Consultants
- Technology Distributors

Partners will gain access to a unified cybersecurity platform, technical enablement, sales support, solution training, and recurring revenue opportunities through managed security services.

Leadership Statement

"Cybersecurity should not be complicated. Through our partnership with Todyl, CyboSec is committed to helping organizations simplify cybersecurity by delivering multiple enterprise-grade security services through one platform, one dashboard, and one agent. Together, we are building a strong partner ecosystem to accelerate cybersecurity adoption across India and the SAARC region."

— **Vinodkumar Bose**

Chief Business Officer

CyboSec Technologies Private Limited

*"AI is changing how threat actors operate. They can find vulnerabilities in systems faster than organizations can patch, run convincing phishing attacks at scale, and fly under the radar to avoid detection. Our platform enables **CyboSec** to help organizations reduce their attack surface, leverage context to detect threats with greater precision, and utilize automation combined with human expertise to respond faster."*

— **Darrin Swan**

Co-Founder and SVP of Sales

Todyl

"AI is changing how threat actors operate. They can find vulnerabilities faster than organizations can patch, launch convincing phishing campaigns at scale, and evade traditional security controls. Our platform enables CyboSec to help organizations reduce their attack surface, leverage context to detect threats with greater precision, and combine automation with human expertise to respond faster. India and the broader SAARC region represent an exciting opportunity as businesses continue to accelerate and demand modern, unified cybersecurity solutions. We're excited to partner with CyboSec to help

organizations and channel partners across the region to deliver stronger security outcomes."

Partner Opportunity

[CyboSec](#) invites technology partners across India and the SAARC region to join its growing partner network and deliver next-generation cybersecurity services to customers.

Whether you are an MSSP, MSP, VAR, System Integrator, ISP, or Cloud Partner, this program offers an opportunity to expand your cybersecurity portfolio and build recurring revenue with a unified platform.

About Todyl

Todyl delivers unified cybersecurity and assurance to help MSPs, IT, and security professionals protect against threats, quantify and manage risk, and demonstrate compliance and insurability. Its cloud-first platform integrates SASE, endpoint security, SIEM, MXDR, SOAR, and GRC into a single-agent architecture, enabling continuous prevention, detection, response, and validation of security outcomes across the entire environment.
