

ExhVerse Makes Hosting an Art Exhibition Online as Simple as Sharing a Virtual Art Gallery Tour

ExhVerse launches a no-code 3D platform that lets artists, curators, and institutions host an art exhibition online and invite audiences into immersive virtual art gallery tours — from any browser, worldwide, with a free plan to start.

Hong Kong, Hong Kong S.A.R. Jul 27, 2026 ([Issuewire.com](https://www.issuewire.com)) - ExhVerse today announced a free, browser-based way for creators to host an [art exhibition online](#) and deliver guided virtual art gallery tours that audiences can explore at their own pace. Built for artists, photographers, educators, and cultural organizations, the platform replaces flat image grids with walkable 3D gallery spaces — no coding, no downloads, and no venue required.

ExhVerse, short for "Exhibit Universe," is a 3D exhibit creator that transforms a folder of artworks into a complete art exhibition online. Users choose a ready-made gallery environment, upload images, add titles and descriptions, and optionally attach audio notes or a clear visiting route. The result is a polished show that opens with one link on desktop, tablet, or smartphone.

What makes ExhVerse especially suited to virtual art gallery tours is its focus on spatial storytelling. Visitors move room by room, pause at each piece, and engage with labels and commentary the way they would at a physical opening — only now the tour is open 24/7 to a global audience. Creators can design a self-paced walk-through for a solo series, a student showcase, or a multi-artist group show without booking space or shipping work.

Accessibility remains central to the product. ExhVerse's free plan lets anyone publish up to three

exhibitions with thirty artworks each — enough to launch a full art exhibition online and share professional virtual art gallery tours at no cost. Creators who need more can upgrade to Pro for up to 30 exhibitions, 200 artworks per show, 4K Ultra HD presentation, video uploads, and logo-free galleries, backed by a 7-day money-back guarantee.

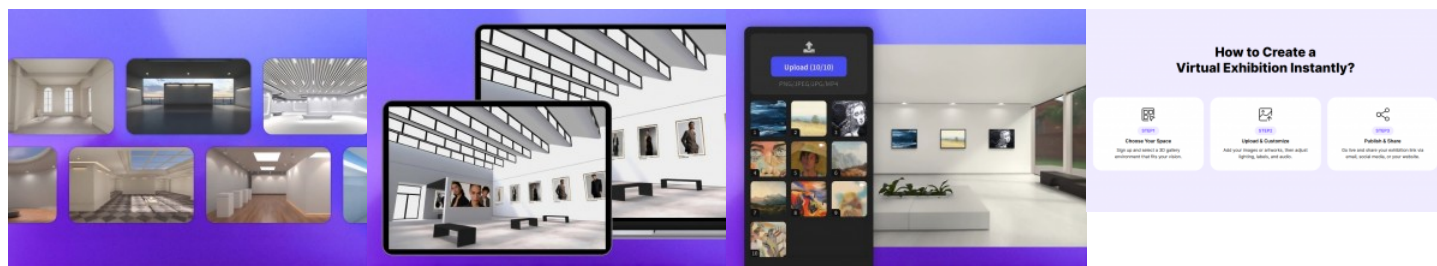

"Hosting an art exhibition online used to mean developers, plugins, or expensive virtual-production tools," the ExhVerse team added. "We removed those barriers so a first-time exhibitor can publish a virtual art gallery tour as easily as uploading a set of photos."

As demand grows for immersive digital culture experiences across creative, educational, and institutional sectors, ExhVerse positions itself as a practical platform for anyone ready to open their next show to the world.
