

FastPCTools Launches Fast Video Maker 2.0 with a New Interface, Multi-Track Editing, and High-Quality Video Export

The latest version of Fast Video Maker introduces a modern editing workspace, live preview, Picture-in-Picture support, improved media management, and export options up to 8K resolution for Windows users.

Jaipur, Rajasthan Jul 18, 2026 (IssueWire.com) - FastPCTools today announced the release of **Fast Video Maker 2.0**, a major update to its Windows video creation software. The new version introduces a redesigned interface, an improved editing workflow, and several new features that help users create professional-quality videos more efficiently.

Fast Video Maker 2.0 is designed for creators, educators, businesses, marketers, and anyone who wants an easy way to create videos without the complexity of traditional editing software. Users can combine photos, videos, text, and audio on a multi-track timeline, preview edits instantly, and export high-quality videos suitable for YouTube, presentations, social media, training materials, and personal projects.

The updated interface focuses on simplicity while giving users greater control over their projects. The new workspace makes it easier to organize media files, edit content, and complete video projects with fewer steps.

Key Highlights of Fast Video Maker 2.0

- Modern and redesigned user interface
- Multi-track editing timeline

- Live preview while editing
- Picture-in-Picture (Video-in-Video) support
- Improved media management
- Advanced text editing tools
- Easy resizing and positioning of videos, images, and text
- Export support for HD, Full HD, QHD, 4K, and 8K resolutions
- Faster performance and improved stability

Unlike browser-based video editors, Fast Video Maker 2.0 works entirely on Windows computers. Users can edit videos locally without uploading large files, helping reduce waiting time while keeping projects under their own control.

"Fast Video Maker 2.0 represents a significant step forward for our video creation software," said a spokesperson for FastPCTools. "The focus of this release is to simplify video creation while providing practical tools that help users complete projects faster."

Fast Video Maker 2.0 is available now through the FastPCTools website.
