

For Readers Planning a Semiquincentennial Road Trip, a Sci-Fi Journey Through Time to Pack Along

A Trip Through Time for Readers Planning Their Own

Washington, D.C, District of Columbia Jul 1, 2026 (Issuewire.com) - As families across the country plan Fourth of July travel to Revolutionary War landmarks for the 250th anniversary, Dex System is offering a different kind of trip through time: *E-Drive: The Good Ghost — A Tale of Choice*, the new novel by Ronald Bartholomew.

The book's central technology, the E-Drive, doesn't just propel its ship the Acheron through space — it can move it backward through time itself, relocating the vessel to a position it occupied eleven seconds earlier to slip past a closing blockade. It's the kind of premise that turns a road trip book into something else entirely: a reminder that the places we visit to touch history were, themselves, once just the present moment, one choice away from becoming what they are now.

Whether readers are walking the Freedom Trail this summer or staying closer to home, *E-Drive* offers a portable companion for anyone drawn to stories about how the past keeps reaching into the present.

E-Drive: The Good Ghost — A Tale of Choice is available now in ebook, print, and audio formats.
