

## F|Staff Celebrates 25 Years of Moving Driver Staffing Forward

Family founded company reflects on a legacy of supporting professional drivers, solving carrier challenges, and modernizing the way the trucking industry works.

**Goodyear, Arizona Jul 1, 2026 ([IssueWire.com](https://www.issuewire.com))** - F|Staff, a privately owned truck driver staffing company connecting qualified professional drivers with carriers across the country, is celebrating its 25th anniversary in 2026.

Founded in 2001 by CEO Justin Clarke, his twin brother, Scott, and their mother, MaryAnn Pennella, F|Staff began with a shared vision to help people find meaningful work while solving real staffing challenges for the trucking industry. What started as a family business has grown into a nationwide driver staffing operation built around the belief that people and technology work best together.

For 25 years, the company has helped carriers keep trucks moving while giving professional drivers greater access to flexible work opportunities. Throughout that growth, F|Staff has remained focused on the people behind every route, delivery, and open driver seat.

“F|Staff has always been about more than filling jobs,” said Justin Clarke, founder and CEO of F|Staff. “My family started this company because we believed there was a better way to support drivers and carriers. Twenty five years later, that belief still guides every decision we make. We have continued to grow, adapt, and introduce new technology, but our commitment to people, service, and doing the right thing has never changed.”

F|Staff originally operated as Contracted Driver Services, providing carriers with access to qualified commercial drivers and helping drivers build careers they could take pride in. As the transportation industry evolved, the company evolved with it, eventually becoming F|Staff and expanding its technology powered approach to driver staffing.

Today, carriers can use F|Staff to find drivers for on demand coverage, dedicated routes, project based needs, and temp to hire opportunities. Professional drivers can explore nationwide opportunities, manage their availability, and choose work that aligns with their experience, schedule, and career goals.

The company's technology has changed how drivers and carriers connect, but personal support remains central to the F|Staff experience. Its team continues to provide dedicated assistance to carriers managing urgent staffing needs and drivers navigating new assignments and career opportunities.

That balance between innovation and human connection has become a defining part of the company's legacy.

"Technology should make work easier, but it should never replace the relationships that make this industry strong," Clarke said. "Every driver, client, and employee has helped shape F|Staff. This anniversary belongs to all of them."

The milestone also honors the legacy of cofounder Scott Clarke and the family foundation on which the company was built. The values established during F|Staff's earliest days continue to influence its culture, including service, adaptability, truthfulness, family, and a determination to find a way forward.

As the company enters its next chapter, F|Staff plans to continue improving the driver staffing experience through practical technology, responsive support, and solutions designed around the real needs of carriers and professional drivers.

The company will commemorate its 25th anniversary throughout 2026 by recognizing the drivers, employees, clients, partners, and family members who contributed to its journey.

"For 25 years, drivers have moved freight, supported communities, and kept businesses running," Clarke said. "F|Staff is proud to support the professionals who make that possible. Truckers drive everything, and that will remain at the heart of what we do for the next 25 years and beyond."

## **About F|Staff**
