

Harrison H. Lee, MD, DMD, FACS, Advances Facial Rejuvenation And Facial Feminization Surgery

Combining Nearly Two Decades of Specialized Surgical Training with Advanced Techniques to Deliver Natural, Patient-Centered Facial Aesthetic Results

Beverly Hills, California Jul 31, 2026 ([Issuewire.com](https://www.issuewire.com)) - Renowned facial plastic and reconstructive surgeon Harrison H. Lee, MD, DMD, FACS, continues to redefine excellence in cosmetic surgery through innovation, precision, and an unwavering commitment to patient care. A rare triple board-certified surgeon with practices in Beverly Hills, California, and Manhattan, New York, Dr. Lee has earned international recognition for delivering sophisticated facial procedures that emphasize natural

beauty, safety, and individualized treatment.

As the Founder of the Beverly Hills Medical Center for Cosmetic Surgery, Inc., established in 2010, and the Beverly Hills Eclipse Surgery Center, Inc., opened in 2023, Dr. Lee has built premier destinations for advanced facial cosmetic surgery. Both facilities reflect his dedication to maintaining the highest standards of surgical excellence while providing patients with a comfortable, state-of-the-art environment focused on exceptional outcomes.

Dr. Lee specializes exclusively in facial cosmetic and reconstructive surgery, offering a comprehensive range of procedures for both men and women. His areas of expertise include minimally invasive endoscopic facelifts, rhinoplasty, neck lifts, cheek implants, facial feminization surgery (FFS), Asian double eyelid surgery, facial contouring, silicone removal, and numerous other advanced facial procedures. Every surgical plan is carefully customized to complement each patient's unique facial anatomy and aesthetic goals.

Central to Dr. Lee's philosophy is the belief that outstanding surgical outcomes begin long before the procedure itself. He places significant emphasis on listening carefully to patients, understanding their concerns, educating them about their options, and developing individualized treatment plans that prioritize realistic expectations and long-term satisfaction. Rather than encouraging unnecessary procedures, he believes informed patients make the best decisions for themselves through honest communication and thoughtful guidance.

This patient-centered philosophy has helped establish Dr. Lee as one of the world's leading authorities in Facial Feminization Surgery, where his work has transformed the lives of transgender women seeking facial harmony that aligns with their gender identity. His expertise has attracted patients from around the world, including several high-profile public figures such as Caitlyn Jenner, Nikita Dragun, and Dylan Mulvaney.

Dr. Lee's extraordinary qualifications are the result of nearly 18 years of rigorous education and surgical training spanning multiple specialties. After earning his Bachelor of Science Degree from Tufts University, he received his Medical Degree from New York Medical College in 1992. He subsequently completed residencies in general surgery and otolaryngology-head and neck surgery at Mount Sinai Medical Center before pursuing a prestigious fellowship in facial plastic and reconstructive surgery at The Lasky Clinic in Beverly Hills under the mentorship of internationally respected facial plastic surgeon Dr. Frank Kamer.

Further distinguishing his career, Dr. Lee also earned a Doctor of Medicine in Dentistry Degree and completed residency training in oral and maxillofacial surgery. This uncommon combination of medical, dental, and surgical expertise provides him with an exceptionally comprehensive understanding of facial anatomy, allowing him to perform highly complex procedures involving both soft tissue and facial skeletal structures with exceptional precision.

Committed to remaining at the forefront of facial plastic surgery, Dr. Lee continually participates in advanced surgical education, live operative workshops, and specialized certification programs. His ongoing pursuit of innovation allows him to incorporate the latest techniques into his practice, including minimally invasive endoscopic facial rejuvenation procedures designed to minimize recovery while producing elegant, natural-looking results.

Dr. Lee's credentials are among the most distinguished in the field. He is triple board-certified by the American Board of Facial Plastic & Reconstructive Surgery, the American Board of Oral & Maxillofacial

Surgery, and the American Board of Otolaryngology–Head and Neck Surgery—a rare achievement that reflects exceptional expertise across multiple surgical disciplines.

His professional accomplishments extend far beyond board certification. Dr. Lee serves as an Overseas Fellow of the Royal Society of Medicine and is a Fellow of the American College of Surgeons, the American Academy of Otolaryngology–Head & Neck Surgery, the American Association of Oral & Maxillofacial Surgeons, the American Academy of Cosmetic Surgery, and numerous additional national and international professional organizations. He is also a Life Fellow of the International Biographical Association in Cambridge, England, further recognizing his contributions to the advancement of cosmetic surgery.

Throughout his career, Dr. Lee has been invited to lecture and present his work at national and international medical conferences, sharing advanced surgical techniques and helping educate fellow physicians worldwide. His expertise has also attracted significant media attention, with appearances on CNN, *ShowBiz Tonight*, and E! Entertainment, along with features in prominent publications including *Forbes*, *USA Today*, *Cosmopolitan*, and *Maxim*.

His exceptional work has also earned recognition as a “Top Physician” by the Consumers’ Research Education Council, reflecting his reputation for excellence among both peers and patients.

While his credentials are impressive, Dr. Lee believes technical expertise alone is not enough. His passion for facial aesthetics, combined with years of advanced surgical experience, allows him to create results that appear balanced, harmonious, and authentic rather than artificial.

“I’ve had the privilege of receiving excellent training, and I owe much of my success to the incredible mentors who guided me,” says Dr. Lee. “My ultimate goal is to prioritize patient safety while designing customized surgical plans that enhance natural beauty and address each patient’s individual concerns.”

Outside the operating room, Dr. Lee has maintained a lifelong dedication to martial arts, earning Black Belt status in multiple disciplines, including Taekwondo and Korean Jiu Jitsu. The discipline, precision, patience, and focus cultivated through martial arts continue to influence his meticulous approach to surgery, reinforcing his commitment to continuous improvement and excellence.

As cosmetic surgery continues to evolve through new technologies and refined surgical techniques, Dr. Lee remains focused on advancing the specialty while never losing sight of the individual patient. By combining exceptional surgical skill, extensive multidisciplinary training, artistic vision, and compassionate care, he continues to help patients from around the globe achieve results that enhance confidence while preserving the natural character and beauty of the face.

With an unwavering commitment to innovation, education, and patient safety, Dr. Harrison H. Lee continues to set the benchmark for facial plastic and reconstructive surgery, demonstrating why he is recognized as one of the world’s foremost leaders in facial aesthetic surgery.
