

Independent Author Explores Solar Geo-engineering, AI and Humanity's Future in New Adventure Novel

Marc Swift, writing under the creative brand The Beekeeper Writer, invites readers to explore solar geo-engineering, artificial intelligence and humanity's future through the thought provoking adventure novel **Don't Panic! You're Just Awake**.

DON'T
PANIC!

YOU'RE JUST
AWAKE

A MATRIX FOR THE YOUNG.
A REALITY YOU WERE NEVER MEANT TO SEE.

WRITTEN BY

MARC SWIFT

Montenegro, Algarve Jul 7, 2026 ([IssueWire.com](https://www.IssueWire.com)) - Independent Author Explores Solar Geo-engineering, Artificial Intelligence and Humanity's Future Through a Bold New Adventure Novel

The Beekeeper Writer Invites Readers to Consider a Third Perspective on One of Today's Most Divisive Conversations

Independent author [Marc Swift](#), writing under the creative brand [The Beekeeper Writer](#), is inviting readers to step beyond today's increasingly polarised conversations with the release of his thought-provoking novel, [Don't Panic! You're Just Awake](#).

Rather than presenting a conventional conspiracy thriller or simply accepting familiar mainstream narratives, the novel combines cinematic adventure, mystery, artificial intelligence and speculative fiction to explore some of the most challenging questions of our time.

Among those questions is a provocative thought experiment:

What if both sides are asking the wrong question?

While the story follows a group of young people uncovering forgotten knowledge, advanced artificial intelligence and the hidden history of civilisation, it also explores one of today's most debated subjects: **solar geo-engineering**.

Rather than asking whether climate intervention is simply right or wrong, the novel imagines a more complex possibility.

If a civilisation genuinely believed it faced severe environmental change, prolonged drought or threats to food security, what difficult choices might it consider in an attempt to preserve humanity's future?

The novel deliberately avoids offering definitive answers.

Instead, it uses fiction to explore uncertainty itself, inviting readers to examine evidence, question assumptions and remain open to the possibility that reality is often more complex than opposing narratives suggest.

Marc Swift makes no claim to possess all the answers.

Instead, he describes himself as an independent observer fascinated by the questions many people are reluctant to explore.

"I've never wanted to tell people what to believe," says Marc Swift. "Curiosity has always driven human progress. My hope isn't that readers agree with me. My hope is that they finish the story asking better questions than when they began. Fiction gives us the freedom to explore difficult ideas without pretending we already know all the answers."

Writing from the mountains of central Portugal, where he combines life as a writer and beekeeper, Marc Swift brings an unusually grounded perspective to speculative fiction. His work blends cinematic adventure, mystery, philosophy, and scientific imagination into stories that celebrate curiosity over certainty.

Marc Swift sees his role not as choosing sides, but as standing between opposing viewpoints and asking the questions each side may have overlooked.

Rather than asking readers to choose between competing narratives, [Don't Panic! You're Just Awake](#) invites them to become careful observers, willing to consider that understanding often begins by asking better questions.

The novel doesn't ask readers what to think. It asks whether we've been asking the right questions in the first place.

Don't Panic! You're Just Awake is available now through **The Beekeeper Writer** website and Amazon.
