

Indian Manufacturer Motley Exim Publishes Technical Guide on Multi-Spectral Camouflage Nets

CAMPRO® manufacturer outlines how modern multi-spectral camouflage nets defeat night-vision, thermal and radar sensors — and how to specify one for defence procurement.

New Delhi, Delhi Jul 21, 2026 ([Issuewire.com](https://www.issuewire.com)) - Motley Exim Co. (CAMPRO®), a New Delhi-based defence-camouflage manufacturer and exporter operating since 1999, has released a comprehensive technical guide on military camouflage nets, as India's armed forces increasingly move from single-band visual netting to multi-spectral concealment.

Modern battlefield assets are no longer watched by the human eye alone. Night-vision devices, thermal imagers, short-wave sensors, battlefield radar and — increasingly — thermal-equipped drones can each detect a target that a plain visual net leaves exposed. This shift has driven demand for multi-spectral camouflage nets that manage an asset's signature across several sensor bands at once, in line with India's defence modernisation and 'Make in India' procurement.

Motley Exim manufactures multi-spectral camouflage nets (3D MSCN), radar-transparent nets, high-attenuation (12 dB) nets and terrain-specific finishes for vehicles, artillery, fixed installations and personnel. Products are NABL-tested with reference to MIL-PRF-53134 and NATO STANAG methods, manufactured under an ISO 9001:2015 quality system, and exported under India's SCOMET framework.

The newly published guide explains what separates a modern military camouflage net from ordinary netting — the sensor bands it must defeat, the main net types, materials and construction, and a five-point checklist for defence procurement. It is available at: <https://motleyexim.com/camouflage-net/>

"Camouflage is no longer a colour problem — it is a signature-management problem across the visible, infrared and radar bands," said [SPOKESPERSON NAME], [DESIGNATION] at Motley Exim Co. "Our aim with this guide is to help procurement teams specify the right net for the actual sensor threat, not just for the human eye."

Motley Exim Co. supplies the Indian armed forces and vetted foreign defence buyers, with export subject to Indian export-control approval and a valid End-User Certificate.

About Motley Exim Co.

Motley Exim Co. (CAMPRO®, FIRE ARMOR®) is a New Delhi-based manufacturer and exporter of defence-grade multi-spectral camouflage nets, sniper ghillie suits, anti-thermal and anti-radar coatings, and self-activating fire-suppression systems. Operating since 1999 (with heritage in specialty coatings from 1986), the company is NABL-tested, ISO 9001:2015 certified and a DGFT-registered exporter (IEC 0599007079).
