

New Novel's Subtitle — "A Tale of Choice" — Arrives Just in Time for America's 250th

A Tale of Choice, for a Country Built on One

New York City, New York Jul 1, 2026 ([Issuewire.com](https://www.issuewire.com)) - Ronald Bartholomew didn't choose the subtitle A Tale of Choice by accident. In E-Drive: The Good Ghost, pilot Mortimer's bond with the vessel Acheron is not something imposed on him — it's something he keeps choosing, over and over, each time the ship's drive asks something of him he can't fully explain wanting to give.

That question — what does it mean to choose, again and again, the thing that defines you — sits closer to the American story than it might first appear. The Fourth of July isn't just a celebration of a document signed in 1776; it's a marker for a two-year run of decisions, retreats, and recommitments that had to be made and remade before independence became real.

"Choice isn't a single moment in Bartholomew's book, and it wasn't a single moment for the country either," said a Dex System spokesperson. "E-Drive is a science fiction novel, but its emotional architecture is built the same way our founding history was — incrementally, and under pressure."
