Apple Valley, California Jul 1, 2026 ([Issuewire.com](http://Issuewire.com)) - The expanded platform offers a wider range of pet care services, helping pet owners discover and connect with service providers for grooming, boarding, training, veterinary care, pet sitting, walking, and other essential pet services.

PetzLover, an online marketplace serving pet owners, breeders, adopters, and pet service providers, today announced the expansion of its [Pet Services platform](#) across the United States. The expanded platform is designed to make it easier for pet owners to find and connect with trusted professionals offering a broad range of pet care services through a single online destination.

As pet ownership continues to grow, many owners seek convenient ways to locate reliable service providers for their pets. PetzLover's expanded Pet Services platform brings together multiple categories of pet care services, allowing users to browse providers based on their location and service requirements.

The platform now features an expanded directory covering services including dog grooming, pet boarding, pet sitting, dog walking, pet training, veterinary services, pet transportation, pet adoption assistance, and additional pet care categories. Service providers can create listings to reach pet owners, while pet owners can explore available options that best meet their pets' needs.

The expansion reflects PetzLover's continued focus on supporting the broader pet community by connecting pet owners with businesses and professionals that provide everyday pet care services. By bringing these services together within the PetzLover platform, the company aims to simplify the process of discovering pet-related services while improving visibility for independent service providers.

"Our goal is to create a convenient platform where pet owners can access a variety of trusted pet services while helping service providers reach people actively looking for pet care," said a spokesperson for PetzLover. "By broadening our Pet Services platform, we are expanding the resources available to pet owners and strengthening connections within the pet care community."

The expanded platform complements PetzLover's existing marketplace, where users can explore pet listings, adoption opportunities, and other pet-related resources. The addition of more service categories provides pet owners with a centralized destination for managing many aspects of pet ownership, from finding a new companion to arranging ongoing care and support.

PetzLover plans to continue enhancing the platform by expanding service categories, improving search capabilities, and introducing additional features that support both pet owners and service providers. These ongoing developments are intended to make the platform more accessible while helping users discover relevant services based on their specific needs.

Pet service providers interested in reaching a broader audience can create listings through the platform, enabling potential customers to discover their services alongside other pet-related resources available on PetzLover.

## About PetzLover

PetzLover is an online pet marketplace and pet services platform that connects pet owners, breeders, adopters, and pet care professionals. The platform offers pet listings, adoption opportunities, and a growing directory of pet services, helping users access pet-related resources through a single online destination. PetzLover continues to expand its offerings to support responsible pet ownership and improve connections within the pet community.
