

Prime Technical Services Expands 24/7 Emergency AC Repair as Dubai Summer Heat Intensifies

With Dubai temperatures climbing through the summer months, Prime Technical Services has ramped up its round-the-clock emergency air conditioning repair service

Dubai, United Arab Emirates Jul 5, 2026 ([Issuewire.com](https://www.issuewire.com)) - With Dubai temperatures climbing through the summer months, Prime Technical Services has ramped up its round-the-clock emergency air conditioning repair service to help homes and offices avoid dangerous downtime during AC breakdowns. The company is urging residents and building managers not to wait until a unit fails completely, as same-day and emergency response slots fill quickly during peak heat periods.

Prime Technical Services provides AC repair, servicing, gas refilling, and full maintenance for both split units and central systems. Technicians inspect, clean, and repair units on-site, with many jobs resolved on the same visit. The company reports that AC failure is consistently one of the most common emergency calls it receives once outdoor temperatures rise, alongside burst pipes and plumbing leaks.

"A broken AC in Dubai in the middle of summer is not a small inconvenience, it is a real health and safety issue," said a company spokesperson. "That is why we keep technicians on call 24 hours a day, seven days a week, so families and businesses are never left waiting in the heat."

The company is reminding customers across its service areas, including International City, Al Barsha, Business Bay, Downtown Dubai, Dubai Marina, JLT, JVC, JVT, Discovery Gardens, Mirdif, Dubai Silicon Oasis, and Dubai Sports City, that regular AC servicing ahead of summer can prevent costly emergency breakdowns. Prime Technical Services offers scheduled maintenance visits as well as emergency call-outs, with transparent, upfront pricing quoted before any work begins.

Residents and businesses needing AC repair or maintenance can reach Prime Technical Services directly by phone, any time of day or night.

For bookings or more information, call +971 54 770 3588 or visit primetechnicalservices.ae.
