

Then vs. Now: Dex System Titles Bridge Two and a Half Centuries of American Life

From political leadership to technological upheaval, these books ask what's really changed

Washington, D.C, District of Columbia Jul 1, 2026 ([IssueWire.com](https://www.issuewire.com)) - What does leadership look like 250 years after the founding? What happens when technology outpaces the humans meant to control it? Dex System's next Semiquincentennial release turns to titles that hold up a mirror between the nation's founding era and its AI-driven present.

James Essex's *Commander in the Chief House* imagines executive power in a radically different context, while Orion Graves' *Dragon Beast* series and Stephen Jacobs' *Cyber Dracula on the Moon* push the "then vs. now" theme into speculative territory — asking how far technology might carry the American story next.

****Featured Titles:****
