

WRXgo Launches Nationwide to Bring Experiential Learning Into the College Environment

WRX empowers universities to give students real-world work experience and to drive revenue to the university

Scottsdale, Arizona Oct 11, 2026 ([Issuewire.com](http://www.wrxgo.com)) - WRXgo announced today the official launch of <http://www.wrxgo.com>, designed to help colleges and universities turn campuses into powerful experiential learning environments. By combining modern hands-on student engagement, WRXgo gives colleges a new way to prepare students for careers while creating meaningful connections between education and relevant work experience.

"Our mission has always been to create opportunities where education meets experience," said WRXgo founder Brad Weisman. "We're giving students the opportunity to apply what they learn in the classroom to real business challenges while helping universities enhance student engagement and career readiness."

As universities continue expanding experiential learning initiatives, WRXgo offers a scalable solution that complements classroom instruction with invaluable workplace experience. Whether integrated into coursework, internships, student organizations, or entrepreneurship programs, WRXgo provides flexible opportunities for students to develop career-ready skills before graduation.

Experiential learning has become a cornerstone of higher education, with employers increasingly seeking graduates who possess practical, hands-on experience alongside academic achievement. WRXgo bridges that gap by providing universities with a platform where students can actively participate.

This launch marks the beginning of WRXgo's national initiative to partner with colleges and universities across the United States, helping to create innovative learning environments that prepare students for success in an increasingly digital economy.

"We believe every student deserves the opportunity to graduate with experience—not just knowledge," added Weisman. "WRXgo represents educational experience that benefits students, universities, and employers alike."

Colleges and universities interested in learning more about partnership opportunities or implementing WRXgo on their campuses are encouraged to visit <http://www.wrxgo.com>.

About WRXgo

WRXgo is dedicated to creating innovative solutions that connect education with real-world experience. Through technology, strategic partnerships, and experiential learning initiatives, WRXgo empowers colleges and universities to prepare students with the practical skills, professional confidence, and hands-on experiences needed to thrive in today's workforce.
