

[illegible]

Today, many of these products remain part of the company's manufacturing portfolio, reflecting a long-standing commitment to engineering practical solutions for the metalworking industry.

Supporting Modern Fabricators

As fabrication technologies and customer needs evolved, Woodward Fab expanded its product offerings to provide industrial-grade equipment for sheet metal forming, metal shaping, and custom fabrication applications.

The company serves a diverse customer base that includes fabrication shops, manufacturers, automotive restoration professionals, educational institutions, and metalworking enthusiasts. Its equipment is designed to help customers improve efficiency, reduce labor costs, enhance workplace safety, and achieve consistent fabrication results.

Through continuous product development, Woodward Fab has expanded its portfolio to include a wide range of fabrication tools that support both professional and growing fabrication businesses.

Four Generations of Manufacturing Excellence

While the company has grown significantly since its early beginnings, Woodward Fab remains a family-owned business that continues to emphasize customer service, product quality, and long-term relationships.

Now in its fourth generation of family leadership, the company continues to invest in new product development while maintaining the craftsmanship and customer-first approach that have defined its history.

"Innovation has always been driven by understanding the challenges fabricators face every day," said a spokesperson for Woodward Fab. "From the first machine built in a home garage to today's extensive lineup of fabrication equipment, our focus has remained the same, develop practical tools that help customers work more efficiently, improve quality, and build with confidence."

As manufacturing continues to evolve, Woodward Fab remains committed to developing fabrication equipment that supports productivity, precision, and innovation across the metalworking industry.

About Woodward Fab

[Woodward Fab](#), a division of Heck Industries, is a manufacturer and supplier of industrial-grade sheet metal fabrication equipment. With roots dating back to Royal Tool & Die in 1947 and Heck Industries in 1966, the company has built a reputation for developing innovative fabrication solutions for professionals, manufacturers, automotive restoration specialists, and metalworking enthusiasts. Today, Woodward Fab offers a comprehensive range of [sheet fabrication equipment](#) designed to improve productivity, precision, and workplace safety while continuing a family tradition of manufacturing excellence spanning four generations.
