

CB Anslie Explores an Ancient Legacy of Light in *Children of Light*

A supernatural thriller where inherited visions, faith, and forgotten history collide in a battle against an ancient evil.

Wilmington, Delaware Aug 10, 2026 ([IssueWire.com](https://www.IssueWire.com)) - What begins with unexplained visions unfolds into a centuries-old battle between light and darkness in **CB Anslie's** *Children of Light*. Blending supernatural suspense with religious history and psychological depth, the novel explores whether destiny is inherited, chosen, or remembered across generations.

At the center of *Children of Light* is a network of individuals whose unexplained visions reveal connections stretching across generations. When a rabbi sacrifices himself in a battle against an unseen evil, Father John Redman is drawn into a mystery surrounding Masada, ancestral memory, and a hidden responsibility that challenges everything he believes about himself. As supernatural events intensify, the novel examines the relationship between free will and destiny, the burden of inherited gifts, and the enduring struggle between darkness and light. Rather than relying solely on supernatural spectacle, Anslie grounds the narrative in deeply human relationships, moral choices, and questions of faith, making the story as emotionally compelling as it is suspenseful.

"Writing has always been a passion because the craft of storytelling adds nuance to daily life in totally unanticipated ways." — CB Anslie

That philosophy shapes *Children of Light*, where extraordinary events emerge through ordinary lives. The novel explores how memory, spirituality, and human connection intersect, inviting readers to consider whether coincidence truly exists or whether unseen forces quietly shape the course of every life.

The daughter of a Lutheran pastor, CB Anslie developed an early fascination with spirituality, philosophy, and storytelling. She earned a bachelor's degree in Philosophy from the University of Maryland and later completed a master's degree in Information and Telecommunications Systems for Business at Johns Hopkins University. After tutoring writing for more than two decades, she turned her attention to fiction, creating interconnected stories that explore inherited psychic abilities, faith, and moral responsibility. *Children of Light* introduces readers to the Arrowson family's hidden legacy, while laying the foundation for the expanding fictional universe continued in *Instrument of Justice*.
