

Classbuk Creates World Record for Highest Altitude on Earth at Which a Live Online Class Has Been Conducted

Thane, Maharashtra Aug 28, 2026 ([Issuewire.com](https://www.issuewire.com)) - [Classbuk.com](https://www.classbuk.com)'s founding family conducts a live interactive online class from approximately 5,364 metres above sea level, demonstrating that technology-enabled education can transcend geographical boundaries

Classbuk, a global live online education platform, created a new world record by successfully conducting a **live interactive online class from Everest Base Camp (EBC), Nepal, at an approximate altitude of 5,364 metres (17,598 feet) above sea level.**

The achievement has been **officially recognized by the World Book of Records, London**, marking a significant milestone for technology-enabled education and highlighting how digital learning can overcome even the most challenging geographical barriers.

The record-breaking session was conducted on **25 May 2026** by **Classbuk** founders **Amit and Seema Goel**, together with their daughters **Shagun and Akshara Goel**, during their trek to Everest Base

Camp. Shagun scored 99.25% in her Grade 12 and had an All India Rank of 3, and is now pursuing MBBS in the prestigious KEM Medical College, Mumbai.

A classroom at the roof of the world

Teachers, students, and parents from different countries participated in a live, two-way interactive session conducted directly from Everest Base Camp. The class covered practical guidance and experiences from the Everest Base Camp trek, along with an introductory discussion on Artificial Intelligence and the ethical use of AI.

“ The purpose behind the initiative was also larger than the record itself: **to demonstrate that technology-enabled education can transcend geographical boundaries**, and that learning and teaching can reach even the remotest and most challenging corners of the world, and remote teaching is a solution to a talented women's workforce globally who are not able to work due to family responsibilities”

— Amit Goel, Founder, Classbuk

More than a world record

For Classbuk, the achievement represents more than an extraordinary technological feat.

The initiative was conceived to demonstrate the transformative potential of technology-enabled education while promoting **women's empowerment and financial independence for educators**.

Classbuk works with a network of educators, including women teachers who can teach safely and flexibly from their homes.

“The company believes that technology can create location-independent teaching opportunities while balancing their personal responsibilities”

Seema Goel, Co-founder of Classbuk

An inspiration for the future of education

The Everest Base Camp initiative represents Classbuk's broader vision: **education without boundaries**.

By bringing a functioning live classroom to one of the world's most remote and challenging environments, the initiative seeks to inspire educators, students, and institutions to rethink the possibilities of digital learning.

The company hopes the achievement will encourage greater adoption of technology-enabled education and create more opportunities for educators—particularly women—to participate in the global education ecosystem.

Classbuk believes that the future of education is not defined by geography, infrastructure, or physical classrooms, but by the ability to connect teachers and learners wherever they may be.

About Classbuk

Classbuk is an award-winning global live online education platform founded in 2020 by CA **Amit and CA Seema Goel**. Founded in 2020, Classbuk provides live online education to students across geographical boundaries, offering **40+ academic and extracurricular subjects** for learners of different ages.
