Chennai, Tamil Nadu Aug 21, 2026 ([Issuewire.com](https://www.issuewire.com)) - Elite Elevators, India's most trusted home elevator company, has presented its complete range of home elevators, comprising both [hydraulic elevators](#) and gearless elevators engineered for Indian residences. The portfolio spans hydraulic home lifts for small homes and retrofits, gearless home elevators with AI-assisted controls, European-engineered hydraulic and gearless cogbelt systems, and stairlifts, all designed to install with minimal civil work in both new and existing homes.

Headquartered in Chennai, the company has completed more than 3,000 installations across India. Its [home elevators](#) are engineered to eliminate the need for a traditional machine room and deep pit while requiring only minimal shaft space. Pit depths range from 59 mm on the X300 range installed with the Xshaft structure to 100 mm on the X200 and X200 Plus, 120 mm on the E200, and 140 mm on the E300, with the E200 and E300 installable using a shallow threshold or ramp in place of a pit altogether.

Headroom starts at 2,300 mm, rising to a shaft top height of 2,500 mm in an existing shaft or 2,600 mm with its own shaft on the E300, and compact cabin footprints are available from 720 × 720 mm. A conventional passenger lift, by comparison, typically requires a pit over a metre deep, a load-bearing masonry shaft, and a dedicated machine room, which is why these models can be accommodated in villas, bungalows, duplexes, and apartments where a conventional lift cannot.

Which Model Fits Your Home?

Buyers can narrow the range quickly using two facts they already know: the number of floors the lift must serve, and how much space is available.

- **One to three upper floors, limited space, budget-led:** the X200 hydraulic home elevator, from ₹14,50,000.
- **One to three upper floors, with app control and restricted floor access:** the X200 Plus, from ₹16,75,000. The pit and headroom requirement is identical to the X200, so upgrading changes nothing about the site work.
- **Four floors or more, or where near-silent operation matters:** the X300 Mark II gearless home elevator, from ₹18,70,000, serving up to six stops.
- **Four floors or more, with AI, biometric access, and cabin monitoring:** the X300 MK II Plus, from ₹20,95,000.
- **European hydraulic engineering with premium cabin finishes:** the E200, from ₹26,80,835, serving up to six stops.
- **Flagship specification with fully custom dimensions and remote diagnostics:** the E300 cogbelt elevator, from ₹48,23,740.
- **Where a staircase is the only practical route:** the E50 stairlift, from ₹13,41,180.
- **Where no standard configuration fits the space:** BeSpoke by Elite Elevators, made to the home's own dimensions.

A complimentary site assessment confirms which of these a specific home can accommodate before any commitment is made.

X200 — Compact Hydraulic Home Elevator

The entry-level model, designed for compact homes and for retrofitting into houses that are already built.

Hydraulic chain drive · up to 0.30 m/s · 400 kg · up to 4 stops · 100 mm pit · 2,300 mm headroom · 600–900 mm manual swing doors

Panoramic glass swing doors, greaseless rails, and zero visible screws, with wall, ceiling, and floor finishes included rather than charged as extras. Standard safety systems: automatic rescue device, emergency cabin lighting with trap-door access, GSM emergency calling with battery backup, ENS fault detection, overload alerts, door safety curtains, automatic re-leveling, and low-voltage cabin operation.

From ₹14,50,000 (G+1), ₹16,50,000 (G+2), ₹18,50,000 (G+3), excluding taxes.

X200 Plus — Smart Hydraulic Home Lift

For the same compact homes as the [X200 Plus](#), but with smart controls, app management, a touchscreen cabin display, and floor access restriction, on identical pit and headroom requirements.

Hydraulic chain drive · up to 0.30 m/s · 400 kg · up to 4 floors · 100 mm pit · 2,300 mm headroom · cabin 1,400 × 1,200 mm standard, custom sizes to order

Adds a 21-inch Live Board cabin display with floor announcements, custom floor naming, and programmable ambience; Live SOS alerting Elite Elevators' technical team at one touch; mobile app monitoring and control; PIN or pattern floor restriction; and instant ENS fault alerts with smart floor positioning.

From ₹16,75,000 (G+1), ₹18,75,000 (G+2), ₹20,75,000 (G+3), excluding taxes.

X300 Mark II — Advanced Gearless Home Elevator

For taller homes, heavier daily use, and households that want the quietest possible operation.

Gearless belt drive · 0.3 to 1.0 m/s selectable · 440 kg · 6 stops · up to 12 doors · 59 mm pit without a shaft, 100 mm with a shaft · travel to 21,000 mm · Cabins: 1,200 × 1,200 mm or 1,500 × 1,500 mm XL

Three ride modes, Sport, Comfort, and Eco, adjust speed, door timing, acceleration, and lighting. An advanced pre-door opening system begins opening the doors just before the cabin stops while remaining interlocked. Cabin and Landing SSD V2 touch displays replace push buttons, with MDR magnetic-driven controls and EGSS technology for precise leveling and gentle starts and stops. Safety systems include dual overspeed governors monitoring both directions, real-time belt monitoring, phase voltage protection, call button jam detection, and GSM calling with battery backup. Sixteen RAL colour options.

From ₹18,70,000 (G+1) to ₹26,70,000 (G+5), excluding taxes.

X300 MK II Plus — AI-Enabled Luxury Home Elevator

The same gearless platform with intelligent automation and access control. As with the X200 to X200 Plus step, the civil requirement does not change.

Gearless belt drive · up to 1.0 m/s · 440 kg · 6 stops · up to 12 doors · 59 mm pit · travel to 21,000 mm · Cabins: 1,200 × 1,200 mm or 1,500 × 1,500 mm XL

Elite AI learns household travel patterns and predicts the intended destination by voice or touch. Biometric access selects a resident's floor by fingerprint, with PIN and biometric restriction locking specific levels. A VisionLog wide-angle cabin camera sends a photo alert on unauthorised use. A 21-inch interactive display handles ride management, weather and news, while the app controls lighting, fan speed, door timing, and custom voice announcements. Live SOS 2.0 alerts emergency contacts and support simultaneously; Dynamic ENS provides real-time fault detection. No AC power in the cabin at all, with automatic sliding doors and DRL signature lighting.

From ₹20,95,000 (G+1) to ₹28,95,000 (G+5), excluding taxes.

E200 — European Hydraulic Elevator

For homes needing more floors than a compact hydraulic model serves, up to six stops with European engineering and premium cabin finishes.

Hydraulic control unit with indirect chain-driven mechanism · 0.15 to 0.3 m/s · up to 400 kg · up to 6 stops · maximum 12 doors · 120 mm pit, or none with a ramp or threshold · travel 12,600 to 13,100 mm · 24 V control voltage

A soft start and stop device with a dedicated motor isolates jerk forces from the cabin. 194 integrated safety parameters provide layered protection monitored continuously in operation. No machine room, single-phase power, greaseless rails, automatic platform control with one-touch call reservation, battery-

operated emergency lowering, and Autodialer with GSM communication. Standard and Elegance cabin collections, rated for indoor and outdoor installation.

From ₹26,80,835 (G+1) to ₹43,23,955 (G+4) Standard; ₹34,98,065 to ₹54,68,314 Elegance, excluding taxes.

E300 — Gearless Cogbelt Home Elevator

The flagship of the range, built on patented gearless cogbelt technology engineered in Germany by TK Access Solutions.

Patented gearless cogbelt drive · 0.15 to 0.4 m/s · up to 400 kg · maximum 6 stops · up to 12 doors · 140 mm pit, or none with a threshold or ramp · travel to 18,000 mm · shaft top height: 2,500 mm existing shaft or 2,600 mm own shaft · 24 V control voltage

The cogbelt mechanism delivers controlled torque and exceptionally smooth travel. A CAN bus connection allows Elite Elevators engineers to read fault history and push software updates remotely, so many issues are diagnosed without a site visit. The rivet-less shaft carries patented seismic resistance with no visible welding or rivets. Safety provisions include an automatic rescue device, dual emergency brakes, an in-cabin GSM phone, AENS advanced error notification, and battery-operated emergency lowering. Cabin dimensions and finishes are fully customisable, including the Elegance collection.

From ₹48,23,740 (G+1) to ₹62,84,839 (G+5) with a client masonry shaft; ₹66,46,249 to ₹95,81,305 with the metal shaft; Elegance from ₹53,71,652, excluding taxes.

From Enquiry to Installation

Buyers can view and ride the exact model at an Elite Elevators Experience Centre before committing. A complimentary site assessment follows, in which an engineer measures every landing, confirms pit and headroom feasibility, and issues drawings specific to the home, including approved shop drawings for architects and builders.

Installation typically takes two to three weeks, with work limited to floor openings and a level base, so most households continue living in the home throughout.

Every installation is backed by Elite Elevators' own nationwide service network, with annual service contracts and on-call support.

To arrange a site assessment or request a quotation, call +91 93616 13131 or email enquiry@eliteelevators.com.

About Elite Elevators

Elite Elevators Private Limited is a residential lift manufacturer headquartered in Chennai, India, offering home elevators, hydraulic elevators, [stairlifts](#), and platform lifts for villas, bungalows, duplexes, apartments, and compact homes. Its lifts install without a machine room or deep pit and with minimal shaft requirements, suiting both new construction and existing homes.

The company has completed more than 3,000 installations across India and operates a nationwide service network. Prices start from ₹14,50,000 onwards, excluding applicable taxes.
