

FEETA Brings AI-Powered Property Search to Delhi-NCR's Real Estate Market

Six categories in one platform is a unique feature in FEETA

The graphic features a large smartphone displaying a map with various property listings. The listings include: Commercial (₹ 2.45 Cr), Residential (₹ 1.25 Cr), Retail (₹ 3.10 Cr), and Land (₹ 85 L). The phone screen also shows a search bar with the text 'Search by location' and a 'Search This Area' button. To the left of the phone, the text 'FEETA MAP SEARCH' is prominently displayed in large, bold letters. Below this, the tagline 'Find the right property. Right where you want.' is followed by four key features: 'Search by Location' (Explore any area on map), 'All Property Types' (Residential, Commercial, Land & more), 'Smart Filters' (Refine by price, size, budget & more), and 'Live & Accurate' (Real-time listings on the map). At the bottom left, the slogan 'Search Smarter. Choose Better.' is written in a stylized font.

New Delhi, Delhi Aug 18, 2026 ([Issuewire.com](https://www.issuewire.com)) - FEETA Technology Pvt. Ltd., a New Delhi-based real-estate technology company, has launched an AI-driven platform designed to make property discovery faster and more transparent for buyers, sellers, and agents across Delhi-NCR.

The platform, branded under the tagline "Smart Search, Smarter Wealth," is built around a single idea:

real estate decisions should be backed by better information, not guesswork. FEETA's AI-powered search tools help users navigate listings across six distinct categories — residential, commercial, retail, industrial, agricultural land, and business-for-sale — a breadth of coverage that is uncommon among Indian property platforms, most of which focus narrowly on residential listings alone.

"Property search in India has traditionally meant sorting through scattered listings with little context," said a FEETA spokesperson. "We built FEETA to bring structure and intelligence to that process, starting with the categories that are usually underserved, like industrial and agricultural land, and business-for-sale opportunities."

The FEETA app is available now on Android and iOS, alongside a web platform, with an initial focus on the Delhi-NCR region ahead of a planned expansion across India. The company's approach centers on verified listings and AI-assisted search, aiming to reduce the friction property seekers typically face when comparing options across a fragmented market.

Real estate remains one of India's largest asset classes, and Delhi-NCR is among its most active property markets. FEETA's early positioning bets on the idea that smarter discovery tools — rather than simply more listings — are what the market has been missing.

For more information, visit www.feeta.in or email info@feeta.in. FEETA is available on Android and iOS.
