

Four Decades of Excellence: Precision Converting and Custom Fabrication Solutions

KraFAB is a proud authorized converter and distributor for the best manufactures in the world. Nimble and dynamic, KraFAB offers the same products with a shorter lead time, flexibility in scheduling and design with outstanding customer service.

Morgan Hill, California Aug 25, 2026 ([Issuewire.com](https://www.issuewire.com)) - For nearly 40 years, **K.R. Anderson, Inc.** has remained a trusted leader in custom fabrication and advanced material converting. As the West Coast's most experienced provider of Form-In-Place (FIP) gasket solutions, the firm combines decades of engineering expertise with cutting-edge capabilities to ensure every project meets the most demanding technical specifications.

Whether scaling production or developing complex, custom designs, K.R. Anderson provides turnkey solutions tailored to your unique requirements.

Core Capabilities

K.R. Anderson offers a comprehensive suite of manufacturing services designed for quality and efficiency:

- **Form-In-Place (FIP) Gasketing:** Turnkey gasketed assemblies ideal for complex patterns. Expertise includes RTV and heat-cure silicones, as well as EMI-conductive and environmental-sealing options.
- **Precision Die Cutting:** Utilizing both steel rule die (SRD) for quick-turn projects and rotary die cutting for high-volume needs, including kiss cutting, zoned adhesives, and multi-layer hybrids.
- **Slitting & Splicing:** Precision slitting for films and foils, alongside custom splicing to create cost-effective O-ring profiles without the need for expensive molding tools.
- **Die-Less Cutting:** High-precision, zero-tooling solutions that allow for fast turnarounds and the ability to cut a vast array of materials with tight tolerances.
- **Sheeting & Laminating:** Expert hybrid multi-layer constructions combining heat spreaders, TIMs, conductors, insulators, and surface protection films.
- **Kitting & Hard Tooling:** Specialized low-contamination assembly for field service and MRO kits, as well as D2 heat-treated steel dies for intricate, high-cycle production requirements.

The K.R. Anderson Advantage

Beyond technical prowess, the company is committed to rigorous quality and security standards. K.R. Anderson is currently **NIST 800-171 compliant** and is actively working toward **CMMC certification**, ensuring they can support clients who require the highest levels of data and manufacturing security.

Get in Touch

Ready to bring precision and reliability to your next engineering project? K.R. Anderson is prepared to help you meet your goals with custom, turnkey solutions.
