

GBP Suspensions Reaches 250+ Google Business Profile Reinstatements Amid 2026 Enforcement Wave

Specialized reinstatement firm reports 98% success rate as Google suspends thousands of local business profiles across the US and Canada

GBP SUSPENSIONS

— PROFILE RESTORATION & RESOLUTION

Bensalem, Pennsylvania Aug 5, 2026 ([IssueWire.com](https://www.issuewire.com)) - GBP Suspensions, a specialized Google Business Profile reinstatement service, has completed more than 250 successful profile reinstatements with a 98% success rate, establishing itself as a leading resource for local businesses facing Google suspensions.

The milestone comes as Google has intensified enforcement actions throughout 2026, suspending thousands of business profiles across industries including home services, healthcare, legal, and hospitality. Many business owners have reported sudden suspensions with little explanation, leaving them without visibility on Google Search and Maps during peak revenue periods.

"Local businesses depend on their Google Business Profile for leads and phone calls. When that profile gets suspended, revenue stops immediately," said Dave, Founder of GBP Suspensions. "We've handled every suspension type — soft suspensions, hard suspensions, disabled profiles, duplicates, and lead generation violations. Each one requires a different approach, and most business owners don't know the difference."

GBP Suspensions offers a done-for-you reinstatement process that includes suspension diagnosis, evidence preparation, appeal submission, and post-reinstatement protection to prevent repeat suspensions. The firm works with contractors, law firms, healthcare providers, restaurants, and marketing agencies managing client profiles.

Business owners dealing with a suspended Google Business Profile can request a consultation at <https://gbpsuspensions.com/contact>.
