Manhattan, New York Aug 23, 2026 (Issuewire.com) - Turquoise Global Holding Inc. today announced the official launch of **PropOrbit**, an advanced AI-powered satellite intelligence platform designed for comprehensive physical asset monitoring and geospatial analysis. PropOrbit transforms complex earth observation data into actionable, real-time intelligence for global industries.

Founded by serial technology entrepreneur Mehmet Ali Ünal—who has successfully founded three technology companies and completed two successful startup exits—PropOrbit is engineered to bridge the gap between raw satellite data and enterprise-grade intelligence. Leveraging cutting-edge space, satellite, and data technologies, PropOrbit is rapidly expanding to provide sovereign satellite intelligence services to governments, with an ambitious corporate vision to achieve a multi-billion-dollar valuation exceeding \$10 billion within the next three years.

PropOrbit delivers tailored, high-impact geospatial solutions across key global sectors:

- **Real Estate:** Empowering real estate professionals with spatial insights and automated market tracking to identify high-potential opportunities via [PropOrbit Real Estate Solutions](#).
- **Agriculture:** Providing agricultural monitoring tools that optimize crop health analysis, yield forecasting, and resource management through [PropOrbit Agricultural Monitoring](#).
- **Energy:** Supporting the solar energy sector with precision site assessments and performance monitoring via [PropOrbit Energy Solutions](#).
- **Construction:** Assisting real estate developers, general contractors, and construction firms with remote progress tracking and site visibility through [PropOrbit Construction Monitoring](#).
- **Asset & Property Management:** Delivering comprehensive portfolio visibility and structural oversight for property owners and management companies via [PropOrbit Asset Owners Solutions](#).

"By automating spatial analysis and combining advanced AI with high-resolution earth observation, we provide organizations and governments with the clarity they need to monitor physical assets proactively, secure critical infrastructure, and uncover hidden market opportunities," said Mehmet Ali Ünal, Founder and CEO.

PropOrbit's launch marks a significant milestone in making geospatial intelligence accessible, scalable, and actionable for modern enterprises, asset managers, and public sector institutions worldwide.

PropOrbit
CONSTRUCTION PROFESSIONALS

VERIFY PROJECT PROGRESS FROM SPACE.

Monitor multiple construction sites and detect delays with satellite intelligence.

- MONITOR SITES**
Track multiple sites from one screen.
- VERIFY PROGRESS**
Compare planned vs. actual progress.
- DETECT DELAYS**
Identify issues early and stay on track.

PLANNED VS. LATEST SCAN
DELAY DETECTED

PropOrbit
AGRICULTURE PROFESSIONALS

THOUSANDS OF ACRES. ONE SCREEN.

Monitor crop health, irrigation and boundaries with satellite intelligence.

- CROP STRESS**
Detect issues early and protect yield.
- IRRIGATION**
Optimize water use and improve efficiency.
- BOUNDARY MONITORING**
Detect changes and protect your land.

CROP STRESS DETECTED
