

IONODES Appoints Serial Tech Entrepreneur Dr. Richard Reiner and Former NASA CIO Renee Wynn to Its Board of Directors

Laval, Quebec Sep 8, 2026 ([Issuewire.com](https://www.issuewire.com)) - [IONODES](https://www.ionodes.com) today announced the appointment of Dr. Richard Reiner and Renee Wynn to its Board of Directors, adding extensive expertise in technology innovation, cybersecurity, artificial intelligence, digital transformation, and organizational leadership.

The appointments come at a pivotal time for IONODES as the company continues to expand its presence in the security and video technology markets while advancing its portfolio of innovative solutions for enterprise, critical infrastructure, and government customers.

"We are delighted to welcome Richard and Renee to the IONODES Board of Directors," said Eric Tasso, President & CEO of IONODES. "Both have built remarkable careers leading innovation, navigating technological change, and helping organizations turn opportunity into long-term growth. As IONODES enters an exciting new chapter, their experience, insight, and perspective will be invaluable as we continue to evolve, innovate, and build for the future."

Richard Reiner is a serial entrepreneur, investor, and technology executive with extensive experience building, scaling, and successfully exiting cybersecurity and artificial intelligence companies. Throughout his career, he has founded and led ventures that are now part of Intel, Telus, and Dell. His expertise spans cybersecurity, artificial intelligence, identity, cloud computing and technology strategy, providing valuable insight into some of the most important trends shaping the future of technology and security.

Beyond his entrepreneurial success, Reiner has advised and supported numerous technology organizations through periods of growth, innovation, and market transformation.

"Throughout my career, I've been drawn to organizations that combine strong technology foundations with a clear vision for the future," said Richard Reiner. "I believe IONODES is well positioned for its next stage of growth, and I look forward to supporting the leadership team and fellow directors as the company continues to evolve."

Renee Wynn brings decades of experience leading enterprise technology organizations, governing large-scale digital transformation initiatives, and overseeing complex cybersecurity programs. Among the highlights of her distinguished career, she served as Chief Information Officer at NASA, where she led a global IT organization responsible for supporting one of the world's most complex and mission-critical technology environments.

"Successful organizations combine vision, innovation, and the ability to execute with purpose," said Renee Wynn. "I see those qualities in IONODES and look forward to working with the Board and leadership team to help guide the company's continued growth and success."

The addition of Richard Reiner and Renee Wynn reflects IONODES' commitment to building a world-class leadership team capable of guiding the company through its next phase of growth while continuing to deliver innovative solutions and exceptional value to customers worldwide.

Renee Wynn

Renee Wynn is a strategic board director, advisor, and former Chief Information Officer (CIO) with more than 30 years of experience leading technology, cybersecurity, and digital transformation initiatives. She concluded her government career as CIO of NASA, where she oversaw a \$2 billion IT portfolio supporting global operations, major space missions, and enterprise-wide digital innovation. Prior to NASA, she held senior leadership roles at the U.S. Environmental Protection Agency, including Acting CIO and Acting Assistant Administrator.

Today, Renee advises boards, executive teams, and technology companies on cybersecurity, AI governance, risk management, and growth strategy. She serves on corporate and advisory boards, helping organizations align technology investments with business objectives, scale operations, and navigate complex regulatory environments.

Dr. Richard Reiner

Dr. Richard Reiner is a serial entrepreneur and executive, investor, advisor, and Board member with many high-growth companies in cybersecurity, AI, and identity.

He was President of PasswordBox (acquired by Intel), Chairman & CEO of Enomaly (now part of Dell); founder, CEO, and CTO of Assurent (acquired by Telus); Executive Chair of dfuse (acquired by The Graph); and Chair of Cybeats (acquired by Scryb).

He has served and currently serves on many other Boards and Advisory Boards of leading cybersecurity and AI companies, and is Managing Partner at CC Stratus Capital.

He is often quoted by the press and holds a Ph.D. and numerous technology patents.
