

ISCPO Welcomes LiveView Technologies (LVT) as Preferred Partner

ISCPO Welcomes LVT to Strengthen Perimeter Protection Across Logistics and Distribution Hubs

Dallas, Texas Aug 17, 2026 ([IssueWire.com](https://www.issuewire.com)) - The International Supply Chain Protection Organization (ISCPO) is proud to announce LVT as its newest Preferred Partner. LVT delivers off-network, AI-driven security solutions that give logistics, distribution, and transportation facilities real-time visibility and rapid deployment flexibility at the perimeter — without dependence on fixed infrastructure. Its enterprise SaaS and hardware-as-a-service platform collects, interprets, and acts on real-time information, helping facilities detect threats early, deter intrusions, and respond faster to incidents at the fence line and beyond.

Together, ISCPO and LVT will collaborate to advance perimeter security across the supply chain and build a best-practice framework to combat rising cargo theft, secure facility perimeters, and protect critical infrastructure.

"With cargo theft and perimeter breaches on the rise, proactive protection is critical. Welcoming LVT as an ISCPO Preferred Partner brings our members rapid-deployment and smart surveillance that deters threats in real time before loss occurs. Together, we're strengthening supply chain security where it's needed most" said **Byron Smith, President & Chairman, ISCPO**

"At LVT we are proud to be joining ISCPO as an official Preferred Partner as we work to advance perimeter security across logistics, distribution, and transportation hubs," said **Matt Kelley, SVP of Business and Market Development at LVT**. "Our shared vision focuses on establishing best-practice frameworks to combat rising cargo theft, secure facility perimeters, and protect critical supply chain infrastructure. By pairing ISCPO's extensive network of supply chain leaders with LVT's off network, AI-driven mobile security units, we are committed to helping facilities turn physical security vulnerabilities into proactive operational advantages."

Together, ISCPO and LVT will explore additional ways to enhance perimeter security and strengthen supply chain resilience.

About LiveView Technologies (LVT)

LiveView Technologies, Inc. (LVT) delivers safety, security, and active intelligence for the physical world by collecting, interpreting, and acting on real-time information. Headquartered in American Fork, Utah, LVT's enterprise SaaS and HaaS solutions are used by retailers, critical infrastructure and utilities, construction projects, warehouse and distribution centers, police, municipalities, and more. LVT products are proudly made in the USA with domestic and foreign parts. For more information, visit www.lvt.com.
