JANCO (8035.HK) launches HK's first Digital Warehouse Receipt Credit Enhancement Platform

Disrupt traditional logistics finance, empowering enterprises to activate inventory assets Building an□IoT + Blockchain + Finance□ecosystem to deliver full-cycle supply chain financing solutions

Hong Kong, Hong Kong S.A.R. Aug 10, 2026 (Issuewire.com) - JANCO Holdings (8035.HK) announces its new digital transformation project **JANCO Digital Supply Chain (JDSC)**, launching Hong Kong's first independent **□Digital Warehouse Receipt Credit Enhancement Platform□**. With blockchain, IoT, and RFID, it tackles logistics finance pain points, creating a secure, transparent, efficient inventory financing channel for local and cross-border enterprises, driving a new **logistics + finance** transformation.

Breaking traditional financing barriers - turning static inventory into dynamic capital

Many firms, especially e-commerce entrepreneurs and brands, face cash strain during stocking, tied-up inventory, long receivable cycles (60–90 days), and difficulty securing financial institutions loans without collateral.

JDSC's?**Digital Warehouse Receipt Credit Enhancement Platform**?positions itself as an independent third-party tech service - "no funds, no credit." It provides financial-grade trust infrastructure: **real goods, in warehouse, immovable**. By integrating digital warehouse receipts, RFID monitoring, and blockchain proof, it resolves trust gaps between financial institutions and enterprises, enabling efficient inventory pledge.

Full value-chain upgrade: JDSC win-win ecosystem

JDSC builds a new digital supply chain linking brands/e-commerce, warehouse operators, and financial institutions, achieving value upgrade across the entire chain.

For brands and e-commerce entrepreneurs?the platform covers procurement, inventory, and receivables financing, solving funding needs across the cycle.

- **Procurement financing**: partner financial institutions pay up to 50% of goods; balance after warehouse arrival. Enables rapid stocking before peak season, scaling purchases up to 2×.
- **Inventory financing**: activate assets, monetize up to 70% of goods value.
- **Receivables financing**: discount immediately upon shipment, speeding cash flow, ending 60–90 day waits.

For warehouse partners: joining JDSC upgrades to financial institutions-recognized IoT smart warehouses, connects to standardized financial services, boosts rental premiums and client stickiness, and shares in financing revenue — up to 20%+. Idle space is monetized, breaking the old profit ceiling.

For financial institutions: JDSC uses blockchain proof, RFID monitoring, and physical anchoring to eliminate risks of duplicate pledges, false collateral, or unauthorized movement. Collateral is fully traceable, status-monitored, and ownership-verified. Financial institutions can finance SME inventory without system changes, cutting supervision costs and credit risk, expanding inclusive finance and lending scale.

JDSC?Digital Warehouse Receipt Credit Enhancement Platform?- 5 Core Advantages

- **Ultra-low cost**: partner financial institutions' annual rates ~8%-12%, far below typical finance companies.
- **High quota support**: financing up to **70% of goods value**, effectively amplifying capital leverage.
- **Fast approval**: funding in as little as 3 working days; renewals same-day.
- **Full-cycle coverage**: one-stop from procurement, inventory, to sales receivables.
- **Compliance & transparency**: blockchain ensures true ownership, directly recognized by financial institutions, no hidden fees.

Currently serving **pharma/healthcare, electronics, and high-value consumer goods**, applicable to cross-border traders, brands, and e-commerce sellers. JANCO will keep upgrading tech, expanding warehouse and financial institutions partners, publishing supply chain finance insights, and driving Hong Kong logistics finance toward digital, compliant, standardized growth.

About JANCO Digital Supply Chain (JDSC)

JDSC uses technology and data to transform fragmented, paper-based supply chains into a connected, smart, transparent, and responsive digital network. It upgrades logistics nodes with full digitalization and intelligence, making operations more transparent, real-time, and manageable — turning the supply chain from a simple **logistics channel** into a value-creating **digital asset**.

About JANCO Holdings (8035.HK)

Founded in 1990 and headquartered in Hong Kong, JANCO has over 35 years of international logistics experience, with a network spanning 50+ countries and 200+ cities across air, sea, warehousing, and supply chain management. “Continuous transformation and embracing change” has become our corporate DNA. From traditional freight forwarding in air, sea, and land, we have evolved into smart logistics, low-altitude economy, digital supply chains, and green logistics — always adapting to change and thriving through innovation. Today, JANCO has successfully transformed from a conventional freight forwarder into Asia’s pioneer of “New Logistics,” integrating advanced technology, global networks, and deep industry insights to deliver disruptive, flexible, and comprehensive smart logistics and modern supply chain solutions.
