

JupLite Launches AI-Powered Solana Token Analysis Platform

Jurmala City, Latvia Aug 27, 2026 ([IssueWire.com](https://www.issuewire.com)) - JupLite, a digital asset research platform developed by Tinika LTD, has announced the launch of a suite of tools designed to help users analyze Solana-based tokens and review market information from a centralized platform.

The newly launched platform combines automated analysis with market data to provide users with information about token activity, liquidity, trading volume, market conditions, and selected risk indicators. The platform is designed to organize multiple data points into a simplified research interface.

JupLite also includes a token screening tool that allows users to explore Solana-based assets according to available market criteria. The screener is intended to help users review token information without having to manually collect data from multiple sources.

Another component of the platform provides access to token swaps through supported blockchain infrastructure. The company said the feature is intended to bring research and token-related tools together within the same user experience.

The platform is available through the JupLite website, while its mobile application, Crypto Signal AI, is available for Android and iPhone users.

Key features of the platform include:

- AI-assisted Solana token analysis
- Automated market-data analysis
- Token screening tools
- Liquidity and trading-volume information
- Selected token risk indicators
- Token swap functionality
- Web and mobile access

According to Tinika LTD, the platform's development focuses on organizing market information and analytical signals into an accessible interface for users researching Solana-based digital assets.

About JupLite

JupLite is a digital asset research platform developed by Tinika LTD. The platform provides tools for analyzing Solana-based tokens, reviewing market information, screening assets, examining selected risk indicators, and accessing supported token-related services.
