

LEADER-MW Showcases DC to 110GHz High-Performance Passive Components at the 2026 Boston IMS Symposium

Chengdu, Sichuan Aug 14, 2026 ([Issuewire.com](https://www.issuewire.com)) - LEADER-MW Showcases DC to 110GHz High-Performance Passive Components at the 2026 Boston IMS Symposium

LEADER-MW (Chengdu Leader Microwave Technology Co., Ltd.), a leading manufacturer of microwave passive components, successfully exhibited at the 2026 IEEE International Microwave Symposium (IMS), held June 9–11 at the Boston Convention and Exhibition Center. At this premier global event for RF and microwave technology, LEADER-MW presented its comprehensive product portfolio and technical capabilities spanning DC to 110GHz to industry experts and customers from around the world.

The IMS exhibition brings together the world's most advanced microwave technologies and solutions, serving as a vital platform for showcasing cutting-edge theories and tools. Seizing this opportunity, LEADER-MW highlighted key advancements in power handling and frequency coverage. The featured product lineup included:

- High-Frequency Passive Components: Power dividers, directional couplers, and hybrid couplers covering DC-67GHz and DC-110GHz bands, demonstrating the company's deep technical expertise in the millimeter-wave spectrum.
- High-Power Solutions: Attenuators and loads with power ratings up to 2000W, designed for demanding high-power applications such as radar and test & measurement systems.
- Signal Conditioning and Control Products: High-performance filters, circulators, and isolators ensuring signal integrity and system stability.

"As a specialized passive component manufacturer, we are committed to delivering high-precision, high-reliability solutions through continuous technological innovation," said a spokesperson for LEADER-MW. "The 2026 IMS provided an excellent global platform for us to showcase our wideband coverage from DC to 110GHz and to engage with industry partners on the evolving demands of future communication and radar systems."

The LEADER-MW booth attracted numerous visitors, with the company's technical experts engaging in in-depth discussions on custom solutions for 5G/6G communications, satellite communications, and defense applications. The successful exhibition further solidifies LEADER-MW's position as a trusted partner in the global RF and microwave industry.

About LEADER-MW

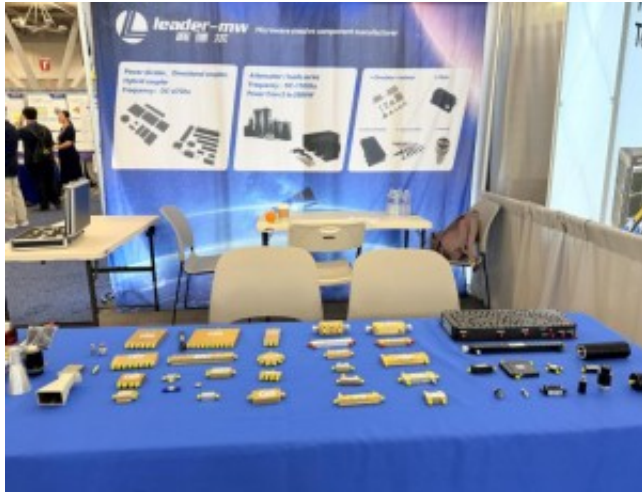

LEADER-MW (Chengdu Leader Microwave Technology Co., Ltd.) is a professional manufacturer specializing in the R&D, production, and sales of high-performance microwave passive components. The product line includes power dividers, directional couplers, hybrid couplers, attenuators, loads, filters, circulators, and isolators, with frequency coverage from DC to 110GHz and power handling capabilities up to 2000W. Driven by a commitment to quality and innovation, LEADER-MW provides critical components to global telecommunications, aerospace, defense, and satellite communications industries.
