

LinkOptimizer for Adobe InDesign Now Supports macOS 27 Golden Gate

Zevrix Solutions releases LinkOptimizer 7.0.5, a compatibility update to its workflow automation tool for Adobe InDesign. LinkOptimizer saves customers hours of manual processing. The update adds support for the Apple's upcoming macOS 27 Golden Gate.

Toronto, Ontario Aug 17, 2026 ([IssueWire.com](https://www.issuewire.com)) - Zevrix Solutions today announces the release of LinkOptimizer 7.0.5, a compatibility update to the company's [image processing automation solution for Adobe InDesign](#). LinkOptimizer frees InDesign users from mundane and time-consuming tasks by streamlining complex image manipulation workflows that involve precise InDesign link replacement after editing in Photoshop.

The new update adds support for the highly anticipated macOS 27 Golden Gate, currently offered as a public beta by Apple. The update is offered free of charge to licensed users of LinkOptimizer.

"Link Optimizer is an absolutely GREAT product," says John Townsend of the eponymous graphic design studio in Kalamazoo, Michigan. "I used to have to do all the conversions manually. This app is a dream. I converted 158 photos for a book project I'm just finishing up tonight — couldn't have done it without you."

LinkOptimizer leverages the power of Photoshop to convert image formats, perform essential image adjustments, and remove excess image data from InDesign links. For example, this powerful tool enables users to effortlessly:

- [Process multiple InDesign files and books automatically](#)
- Scale and crop images to match their InDesign dimensions precisely
- Change their resolution to 300 ppi
- [Convert PNG to TIFF](#)
- [Convert RGB images to specific CMYK profile](#)
- Flatten images
- Copy all unprocessed links into the same folder to form a complete package

As a result, users can [free gigabytes of costly disk space](#) and save countless hours spent on manual image optimization, accelerate document output, reduce job turnaround times, and ultimately cut costs through faster processing.

Pricing and Availability:

LinkOptimizer can be purchased from Zevrix website for US\$259.95 (Lite version: \$179.95) as well as from Adobe Exchange and authorized resellers. Trial is also available for download. The update is free for LinkOptimizer 7.x users and \$130 to upgrade from previous versions. LinkOptimizer requires macOS 10.12-27.x and Adobe InDesign / Photoshop CS6-2026.

About Zevrix Solutions

Located in Toronto, Canada, Zevrix Solutions provides productivity solutions for Adobe Creative Suite software, PDF and graphic file diagnostics, as well as Microsoft Office on Mac OS. Zevrix Solutions is dedicated to helping professionals increase their profits through automating their everyday tasks, producing error-free documents, saving disk space and cutting production costs. Convert Image Formats

☒ Process all images regardless of resolution settings
Links will be converted if required by settings below even if their resolution/size should not be optimized.

Convert from... to...

☒ Photoshop (PSD) ☐ TIFF ☐ Photoshop EPS ☐ JPEG ☐ PNG ☐ HEIC ☐ GIF ☒ WebP ☐ BMP

☒ Preserve PSD layer visibility applied in InDesign
PSD links will be converted using layer visibility applied in InDesign if different from the original PSD image.

Note: You can choose conversion to the same format, for example TIFF > TIFF, to reuse all images using specific format conversion settings.

Conversion Settings...

☒ Embed color profile ? ☐ Reuse all JPEGs in Photoshop
Otherwise Photoshop may present the Save As dialog for certain JPEG images such as the ones created by digital cameras.

Edit Images

☒ Process all images regardless of resolution settings
All links will be edited as required by settings below even if their resolution/size should not be optimized.

Colors

☒ Convert colors: RGB to CMYK ☐ Convert to profile: ISO Coated v2 (ECI) ☐ Intent: Relative Colorimetric ☐ Use Black Point Compensation ☐ Use dither

Note: Photoshop may discard certain adjustment layers when converting colors.

Sharpening

☒ Apply Sharpening ☐ Unsharp Mask ☐ Sharpen ☐ Sharpen More

Amount: 100 % Radius: 1.0 pixels Threshold: 0

Note: You can use any Photoshop filter by creating an appropriate Photoshop action, then specifying the action in the Advanced settings of LinkOptimizer.

Layers

☒ Merge layers ☒ Merge visible layers ☐ Flatten image ☒ Delete hidden layers

Note: Not all hidden layers will be deleted if there are conditions that normally prevent Photoshop from deleting layers.

Alpha channels

☒ Save alpha channels ☐ Discard to remove alpha channels
