Chennai, Tamil Nadu Aug 4, 2026 ([IssueWire.com](https://www.issuewire.com)) - MH Cognition Launches MH Connekt, an AI-Powered HRMS Platform to Simplify Workforce Management for Growing Businesses

New platform automates payroll, attendance, recruitment, and performance tracking for growing businesses worldwide

MH Cognition, a technology venture under MHC Global Pvt. Ltd., today announced the launch of **MH Connekt**, an AI-powered Human Resource Management System (HRMS) designed to help startups, growing businesses, and enterprises simplify and automate their HR operations from a single platform.

MH Connekt brings together payroll processing, attendance tracking, recruitment, employee onboarding, and performance management into one intelligent, connected system, replacing the fragmented spreadsheets and disconnected tools many HR teams still rely on today.

“Businesses today need more than just basic HR software. They need intelligent systems that can adapt, automate, and grow with their workforce,” said Ahamed Yasir, CEO of MH Cognition. “With MH

Connekt, we set out to build a platform that doesn't just digitize HR paperwork, but genuinely makes work more human, giving HR teams the time and insight to focus on people, not processes.”

Built for Modern, Growing Organizations

Core capabilities of MH Connekt include:

- **Automated Payroll Processing:** accurate, compliant salary runs with built-in statutory deductions, adaptable to regional compliance requirements
- **Attendance & Leave Management:** real-time tracking with self-service access for employees
- **Recruitment & Onboarding:** streamlined hiring workflows from job posting to day-one onboarding
- **Performance Management:** structured tracking and reviews backed by real-time analytics
- **AI-Driven Insights:** dashboards that surface turnover trends, hiring gaps, and workforce patterns before they become problems

Designed to Scale With the Business

MH Connekt has been built to serve organizations at different stages of growth, from early-stage startups setting up HR processes for the first time, to larger enterprises looking to modernize legacy systems. The platform's self-service tools are aimed at improving the day-to-day employee experience, while its analytics layer is designed to give leadership teams data-backed visibility into workforce trends.

“Investing in the right HR software isn't just about going digital; it's about results,” added Ahamed Yasir. “Reduced administrative overhead, better data-driven decisions, and a smoother employee experience—that's what we built MH Connekt to deliver.”

Availability

MH Connekt is available now for businesses worldwide, with onboarding support provided directly by the MH Cognition team. Interested organizations can request a demo or more information through the MH Connekt page on the MH Cognition website.
