

Montezy GmbH Goes Live to Make Cross-Border Money Management Clearer

Bachenbulach, Zurich Aug 24, 2026 ([IssueWire.com](https://www.IssueWire.com)) - The Swiss fintech platform brings multi-currency money management, international payments, prepaid cards and digital-asset services into one transparent experience

Montezy GmbH, a Swiss financial-technology company, today announced the official launch of Montezy,

a modern financial platform created for individuals, freelancers and businesses whose financial lives extend across borders.

Built around the principle of “Swiss clarity for money without borders,” Montezy brings everyday money management, international payments, prepaid cards and digital-asset services into one straightforward experience.

Making global finance easier to understand

Managing money internationally often means navigating multiple providers, unfamiliar fees, fragmented account information and complicated financial terminology.

Montezy was created to make that experience clearer.

Through its digital platform, Montezy gives eligible customers access to multi-currency money management, international payment capabilities, prepaid cards, card controls and supported fiat and digital-asset services.

The platform is designed to help customers understand their options, see relevant transaction information and remain in control of how they manage and move their money.

“People and businesses increasingly live and operate across borders, but financial services can still feel fragmented and unnecessarily difficult to understand,” a spokesperson for Montezy GmbH said. “We built Montezy to bring these essential capabilities together in a clearer experience—supported by transparent information, responsible controls and a strong Swiss foundation.”

Designed for modern financial lives

Montezy serves customers whose personal or professional activities are not limited to one country or currency.

For individuals, the platform provides a clearer way to manage supported currencies, make international payments and spend at home, online or while travelling.

For freelancers and internationally active businesses, Montezy is designed to simplify receiving client payments, managing operating expenses, paying suppliers and keeping cross-border financial activity in view.

Montezy’s services include:

- Multi-currency money management for supported currencies
- Personal IBAN functionality for eligible customers
- International payment capabilities through supported networks
- Prepaid debit cards for everyday and international spending
- Card controls and transaction alerts

- Clear pricing and transaction information
- Digital onboarding
- Fiat and cryptocurrency exchange services
- Digital-asset custody features
- A consolidated view of everyday financial activity

Specific services, currencies, payment networks and product features remain subject to customer eligibility and market availability.

A Swiss foundation for responsible growth

Montezy GmbH is a Swiss limited liability company incorporated and registered in Zug, Switzerland.

Montezy GmbH is a member of VQF, a self-regulatory organisation recognised by the Swiss Financial Market Supervisory Authority FINMA, and is supervised by VQF for compliance with the Swiss Anti-Money Laundering Act.

VQF is responsible for supervising its members in relation to the prevention of money laundering and terrorist financing. Its work includes regulatory supervision, auditing, inspection and training for financial intermediaries subject to Swiss anti-money-laundering requirements.

“Compliance should not be treated as a marketing label or added after a company begins to grow,” the Montezy spokesperson added. “It should be reflected in how customers are onboarded, how risks are assessed, how decisions are documented and how a company communicates its responsibilities. That principle is part of how Montezy operates.”

Montezy intends to maintain the same standard of clarity as it expands its platform, services and international reach.

Connecting traditional and digital finance

Montezy’s long-term vision is to become a trusted bridge between traditional finance and the digital economy.

By bringing established financial services and supported digital assets into one experience, Montezy aims to give customers greater flexibility without sacrificing clarity or responsible controls.

The company will continue developing its platform around three central principles: understandable financial tools, transparent information and greater customer control.

Regulatory clarification

Montezy GmbH is a member of VQF, a FINMA-recognised self-regulatory organisation, and is supervised by VQF for compliance with the Swiss Anti-Money Laundering Act.

VQF membership concerns anti-money-laundering supervision only. It is not a banking licence, does not provide deposit insurance and does not mean that Montezy GmbH is directly prudentially supervised by FINMA. Montezy GmbH is not a bank and does not accept public deposits.

About Montezy GmbH

Montezy GmbH is a Swiss financial-technology company providing clear, transparent and internationally oriented financial services for individuals, freelancers and businesses.

Its platform brings multi-currency money management, international payments, prepaid cards and supported digital-asset services into one straightforward experience.

Montezy's mission is to help customers manage money and digital assets with greater clarity, confidence and control.
