

Naturfurn Launches a 16-in-1 Smart Sit-Stand Workspace System Designed for Every Mode of Your Day

The innovative workspace system combines a three-tier design, built-in storage, smart lighting, and flexible solutions for work, creativity, and entertainment.

Seattle, Washington Aug 6, 2026 ([Issuewire.com](https://www.issuewire.com)) - Naturfurn today announced the launch of the Naturfurn 16-in-1 Smart Sit-Stand Workspace System, an all-in-one smart workstation designed for modern home offices, content creators, gamers, and multifunctional workspaces. Combining a three-tier workspace design, 30cm storage depth, multi-monitor support, smart sit-stand functionality, and integrated smart features, Naturfurn aims to help users create a cleaner, more efficient, and flexible personal workspace. **Naturfurn will soon launch on [Kickstarter](https://www.kickstarter.com), where early supporters will have access to exclusive discounts and special launch benefits.**

Naturfurn features a unique **Three-Tier Workspace Design** that uses vertical space organization to optimize the placement of monitors, devices, tools, and everyday items. Each layer serves a different purpose, including primary workspace, equipment expansion, and storage management, allowing users to create a more organized and efficient setup within a limited space.

To meet the growing needs of modern users, Naturfurn provides **30cm Storage Depth** and integrates a **Hidden Pull-Out Storage System**, offering convenient storage for office supplies, creative tools, electronic accessories, and personal items while helping maintain a cleaner desktop environment.

For users with multiple devices, Naturfurn supports an **Easy-Install Multi-Monitor Setup**, making it easier to build a multi-monitor workspace suitable for office work, multimedia creation, design, gaming, and other professional or creative scenarios.

Under its smart control system, Naturfurn features an electric sit-stand adjustment system with **three height memory presets**, allowing users to switch between sitting and standing positions based on different tasks and preferences. Voice-controlled lighting, built-in power outlets, USB ports, and wireless charging further improve convenience for everyday use.

Naturfurn also introduces an innovative **Drawer-to-PC Bay design**, allowing users to transform the space based on their needs. The area can function as a daily storage drawer or be converted into a dedicated PC compartment for devices such as desktop computers and 3D printers, providing a more flexible workspace solution for different users and setups.

For materials, Naturfurn uses an **ENF Eco-Friendly Board**, combining modern design with stable construction while considering material sustainability and everyday user experience.

With its multifunctional design and modular layout, Naturfurn is suitable for home offices, content creation, design work, DIY projects, gaming setups, and learning environments. Whether users need a multi-monitor workstation, better equipment organization, or a personalized desktop system, Naturfurn provides a complete smart workspace solution designed to adapt to different lifestyles.

To see Naturfurn in action, watch the official product demonstration video, showcasing its smart sit-stand adjustment, three-tier workspace design, storage system, multi-monitor setup, and integrated features. Watch the [video](#) here.

The Naturfurn team stated, “We believe the future workspace should be more than just a desk. It should be a complete system that adapts to different needs. Naturfurn combines furniture design, smart functionality, and space management to help users create a more efficient and comfortable environment for work and creativity.”

Early supporters will have the opportunity to access exclusive launch benefits and special discounts through the Kickstarter campaign.
