

PCERF Opens Stall Bookings for CONSTRO International Expo 2027 in Pune | 21st Edition

Pune, Maharashtra Sep 3, 2026 ([Issuewire.com](https://www.issuewire.com)) - The [Pune Construction Engineering Research Foundation](#) (PCERF) has officially opened stall bookings for CONSTRO International Expo 2027. Marking its 21st edition, the biennial event stands among India's longest-running integrated construction exhibitions. The trade show takes place from 7-10 January 2027 at the Pune International Exhibition and Convention Centre (PIECC), Moshi, Pune.

For over two decades, CONSTRO International Expo has served as a centralized meeting ground for professionals across the built environment. The upcoming edition convenes building material manufacturers, machinery suppliers, technology providers, civil contractors, property developers, architects, structural engineers, project management consultants, and trade policy decision-makers.

Connecting the Infrastructure and Building Ecosystem

The Indian construction and real estate sector continues to experience steady structural growth, driven by urban infrastructure projects, residential developments, and industrial expansion across western India. CONSTRO 2027 provides an operational venue where industry participants display tangible solutions, negotiate commercial agreements, and address field challenges.

Organized directly by PCERF, a non-profit organization established by civil engineering practitioners, the expo focuses on technical advancement, safe building practices, and sustainable material usage. Detailed information about the foundation's history, research initiatives, and board members is available on PCERF's About Us page.

Why Exhibitors Are Securing Space Early for CONSTRO 2027

Exhibiting at the 21st edition of CONSTRO offers commercial and brand advantages for companies operating within the construction value chain:

- **Direct Access to Decision-Makers:** Engage face-to-face with practicing architects, structural engineers, government procurement officials, and tier-1 contractors seeking verified suppliers.
- **Product and Technology Displays:** Showcase physical heavy machinery, smart building automation, raw materials, finishing supplies, and sustainable construction techniques in dedicated exhibition bays.
- **Commercial Lead Generation:** Acquire qualified business inquiries from site engineers, project leads, and purchasing heads evaluating technical specifications for active projects.
- **Market Entry and Expansion:** Position regional, national, and international brands in front of Western Maharashtra's expanding industrial and real estate development corridors.
- **New Product Launches:** Introduce new material formulations, digital site software, or equipment models to an audience of active industry professionals.

Participants can view booth layouts, hall dimensions, and space availability directly on the [Constro India](#) main website.

Strategic Significance of the PIECC Moshi Venue

The choice of the Pune International Exhibition and Convention Centre (PIECC) in Moshi offers modern infrastructure necessary for large-scale industrial trade shows. Located strategically along major transport arteries connecting Pune to industrial hubs in Pimpri-Chinchwad, Chakan, Talegaon, and Mumbai, the venue accommodates heavy equipment displays, machinery demonstrations, and high footfall counts across all four days.

Participation Focus Areas

The exhibition floor at CONSTRO 2027 features distinct zones covering:

- Construction equipment, earthmoving machinery, and concrete technologies
- Structural steel, cement, aggregates, and advanced concrete mixes
- Waterproofing, insulation, construction chemicals, and protective coatings
- Electrical systems, MEP services, smart lighting, and energy management
- Plumbing, sanitaryware, doors, windows, and architectural hardware
- Formwork, scaffolding, safety gear, and site monitoring software

How to Secure Exhibition Space

Because space allocation proceeds sequentially, early booking secures prime aisle and entrance locations across the exhibition halls. Interested organisations, OEMs, and service firms can submit their

space requirements online.
