

PRAB Advances Manufacturing Efficiency with Innovative Scrap, Fluid and Wastewater Solutions

Kalamazoo, Michigan Aug 26, 2026 ([Issuewire.com](https://www.issuewire.com)) - PRAB, a global manufacturer of engineered solutions for metalworking and industrial manufacturing, continues to help companies improve operational efficiency, recover valuable resources, and reduce environmental impact through advanced metal scrap processing, fluid recycling, filtration, and industrial wastewater treatment systems.

With more than 75 years of industry experience, PRAB designs equipment to address some of the toughest waste-handling and resource-recovery challenges in manufacturing. Its solutions support industries including automotive, aerospace, medical, energy, electronics, and metalworking. Visit: [industrial wastewater treatment systems](#)

PRAB's portfolio includes metal scrap conveyors, chip processing equipment, coolant recycling systems, fluid filtration technology, and industrial water and wastewater treatment solutions. By integrating these systems into manufacturing operations, facilities can automate material handling, recover reusable fluids, reduce waste volumes, and improve overall productivity.

The company's coolant recycling and filtration technologies are designed to extend fluid life and reduce the need for new coolant purchases and waste disposal. PRAB also offers customized wastewater treatment systems incorporating technologies such as ultrafiltration, reverse osmosis, vacuum

evaporation, and automated pH adjustment to support water reuse and regulatory compliance. Click: [vacuum evaporation systems](#)

A key advantage of PRAB's approach is its focus on integrated, application-specific solutions. Rather than treating metal scrap, spent fluids, and wastewater as separate challenges, PRAB engineers systems that can work together to create more efficient, closed-loop manufacturing operations.

PRAB is headquartered in Kalamazoo, Michigan, and serves manufacturers across global markets. The company combines engineering expertise, durable equipment, and ongoing technical support to help customers improve profitability while advancing sustainability goals.

About PRAB:

PRAB is a leading manufacturer of metal scrap processing equipment, conveyors, coolant recycling and fluid filtration systems, and industrial wastewater treatment solutions. For more information, visit [PRAB](#).
