

Preferred Health Magazine Lights Up Times Square, Honoring Media Icons, Wellness Leaders & Doctors of Distinction

Health, Innovation & Star Power

New York City, New York Aug 27, 2026 ([Issuewire.com](https://www.issuewire.com)) - ***Preferred Health Magazine*** celebrated the launch of its highly anticipated Summer Edition with an unforgettable evening at celebrity hotspot Fushimi Times Square, bringing together legendary media personalities, influential wellness professionals, fitness leaders, longevity innovators and an elite gathering of healthcare and business professionals.

At the center of the celebration were the distinguished individuals gracing the Summer Edition, including legendary reporter Marvin Scott, media host and author Marci Hopkins, fitness coach and wellness personality Michelle Sullivan, and Thre Aktiv creator Deana Kelly.

The evening also honored an exceptional group of Preferred Health Magazine Doctors of Distinction, whose pioneering work is helping shape the future of healthcare. Honorees included Dr. David & Dr. Zoe Karli, recognized for their work in regenerative and longevity medicine; Dr. Stuart & Dr. Noelle Diamond, leaders in hormonal health and wellness; Dr. Daniel Briggs, an expert in stem cell research and regenerative medicine; Dr. James McGlowan, esteemed for his expertise in orthopedic and robotic surgery; and Dr. Adam Silevitch, a distinguished specialist in pediatric dental care.

The celebration quickly became more than a magazine launch. Throughout the evening, conversations flowed around the future of healthcare, longevity, regenerative medicine and medical innovation, with honored guests and professionals connecting, exchanging ideas and exploring opportunities for future collaborations.

“It’s such an exciting time in healthcare and the way we can approach preventative and regenerative medicine, as well as how technology is making treatment and access to quality care more accessible on a global scale,” said Angelina Cappiello, Editor-in-Chief of Preferred Health Magazine. “Whether it’s robotic surgery, virtual reality, or genetic testing, my promise is to continue to keep you informed. Education is the key, and our health is everything.”

The event embodied the spirit behind Preferred Health Magazine’s signature philosophy: “Keeping Health Hip.” From cutting-edge medical breakthroughs to inspiring personal stories, celebrity conversations and the latest in wellness, PHM continues to create a platform where health meets culture, innovation and lifestyle.

Guests enjoyed an evening of networking, celebration and lively conversation at Fushimi Times Square, while sponsors Envo Elegant Water, Once Upon a Coconut, and Vogga Italia Prosecco kept the crowd refreshed and the celebration flowing. The festivities included a special birthday celebration for Dr. David Karli, adding another memorable moment to the night.

The evening also highlighted the spirit of paying it forward — a theme that continues to define Preferred Health Magazine and the professionals it celebrates. From physicians advancing innovative treatments to media personalities, wellness advocates and entrepreneurs using their platforms to inspire others, the Summer Edition recognizes individuals who are making an impact far beyond their own careers.

As conversations continued late into the evening, the event reflected the growing influence of Preferred Health Magazine as a media platform connecting the public with the people, ideas and innovations shaping the future of health.

And overlooking it all was PHM’s iconic Times Square billboard, lighting up the night and creating a fitting backdrop for a summer celebration that was as bold, energetic and forward-thinking as the magazine itself.

With a growing audience, an expanding roster of distinguished physicians, professionals and celebrity voices, and a commitment to making complex health topics engaging and accessible, Preferred Health Magazine continues its mission to “Keep Health Hip” — while keeping readers informed, inspired and empowered to take charge of their health.
