

Quran and Science: A Psychiatrist's Journey through Faith, Mind, and the Cosmos

Dr. Hasan Derwish's insightful exploration of the relationship between faith, psychology, and scientific discovery, is now available.

Edgbaston, Birmingham Aug 4, 2026 (Issuewire.com) - For centuries, the relationship between science and religion has been the subject of intense debate. While many view the two as fundamentally at odds, Dr. Hasan Derwish, a Consultant Forensic Psychiatrist with decades of clinical experience, presents a compelling alternative perspective in *Quran and Science: A Psychiatrist's Journey through Faith, Mind, and the Cosmos*. Drawing upon both his medical expertise and his lifelong study of the

Quran, Dr. Derwish explore show scientific inquiry and divine revelation can work together to deepen humanity's understanding of the universe and ourselves.

Quran and Science takes readers on an intellectual journey through some of the most profound questions surrounding creation, existence, and consciousness. Rather than positioning science and faith as competing explanations of reality, the book examines how advances in modern scientific knowledge can complement and enrich the timeless teachings of the Quran. Dr. Derwish encourages readers to approach these subjects with curiosity, reason, and an openness to thoughtful dialogue.

Written from the unique perspective of a psychiatrist, the book explores a wide range of disciplines, including cosmology, astronomy, geology, embryology, biology, physics, psychology, and the study of consciousness. Alongside these scientific discussions, Dr. Derwish reflects on the Quran's descriptions of the natural world and the human condition, inviting readers to consider how faith and scientific discovery together can inspire a more complete understanding of existence.

What distinguishes the book is its ability to bridge multiple fields without sacrificing accessibility. Dr. Derwish combines complex scientific concepts with practical insights from psychiatry and spiritual reflection, making the subject matter approachable for readers from a wide range of backgrounds. Whether discussing the origins of the universe, the remarkable processes of human development, or the psychological dimensions of belief, the book remains grounded in careful analysis rather than sensational claims.

Throughout the book, Dr. Derwish also examines the relationship between mental well-being, purpose, morality, and spirituality. His experience in forensic psychiatry provides a distinctive lens through which to explore questions of human behaviour, consciousness, and the search for meaning. Rather than presenting definitive answers to every mystery, he encourages readers to appreciate both the power of scientific investigation and the enduring value of faith in understanding life's deepest questions.

Accessible to believers, healthcare professionals, students, academics, and anyone interested in the intersection of science, philosophy, and religion, *Quran and Science: A Psychiatrist's Journey through Faith, Mind, and the Cosmos* offers a balanced and thought-provoking contribution to one of humanity's most enduring conversations. By encouraging respectful dialogue between scientific inquiry and spiritual reflection, Dr. Derwish presents a work that seeks not to divide these disciplines, but to demonstrate how each can illuminate the other.

About the Author

Dr. Hasan Derwish is a Consultant Forensic Psychiatrist whose professional career has focused on understanding the complexities of the human mind and behaviour. Alongside his medical practice, he has maintained a lifelong interest in the relationship between Islamic scholarship, psychology, and scientific discovery. Through *Quran and Science: A Psychiatrist's Journey through Faith, Mind, and the Cosmos*, Dr. Derwish brings together clinical expertise and thoughtful reflection to encourage meaningful dialogue between faith and science, inviting readers to explore how both disciplines can contribute to a deeper understanding of humanity and the universe.
