

SearchUs Launches WordPress Site Search Plugin for Faster, More Relevant Search

SearchUs is a WordPress site search plugin that replaces the default search with relevance-ranked results across pages, posts, WooCommerce products, PDFs, images, videos, and documents, helping visitors find content faster and more accurately.

Boise, Idaho Aug 3, 2026 ([IssueWire.com](https://www.issuewire.com)) - FunnelWon.com LLC today announced the launch of **SearchUs**, a WordPress site search platform and plugin designed to help website owners replace WordPress's default search with faster, more relevant search results across their websites.

For many WordPress websites, search is one of the primary ways visitors discover products, articles, documents, and other content. However, default website search often returns incomplete or poorly ranked results, making it difficult for users to find what they're looking for. SearchUs addresses this challenge by providing a dedicated hosted search index and a customizable search experience that helps visitors locate relevant content more quickly.

After installation and activation, SearchUs indexes WordPress pages, posts, WooCommerce products, PDFs, images, videos, and other supported media, delivering relevance-ranked results through a customizable Search Engine Results Page (SERP). Website owners can configure ranking priorities, create promoted search results, enable synonym and intent matching, recover visitors from 404 errors with related content suggestions, and customize the appearance of the search results page to match their website.

"Visitors who use site search are often your most engaged users because they're actively looking for something specific," said Michael Whitaker, founder of FunnelWon. "SearchUs was built to help website owners deliver a better search experience so visitors can find the content they need quickly and stay engaged."

Unlike many search plugins that limit administrative functionality by subscription tier, SearchUs makes the same core configuration options available across all plans. Service plans differ primarily by indexed URL limits, monthly search volume, reindex frequency, and optional branding removal, allowing websites to scale as their content grows.

SearchUs is designed for businesses, WooCommerce stores, educational institutions, publishers, membership websites, nonprofits, and organizations that depend on effective internal site search to help visitors discover products, services, documents, and information.

Key Features

- Hosted search index for improved relevance and performance
- Searches pages, posts, WooCommerce products, PDFs, images, videos, and documents
- Customizable Search Engine Results Page (SERP)
- Configurable relevance ranking and weighting
- Synonym and intent matching
- Smart 404 recovery with related content suggestions
- Optional "Did You Mean?" search suggestions
- Promoted search results
- List and grid search layouts
- Simple WordPress installation and setup

SearchUs is available immediately with free and paid plans.
