

# SlideUpLift Launches Creatos AI, the AI Presentation Maker That Never Starts From a Blank Page

**Jersey City, New Jersey Aug 16, 2026** ([Issuewire.com](https://www.issuewire.com)) - Free to try, with 40,000+ professionally designed slides, AI-assisted editing, one-click branding and a fully editable PowerPoint at the end

SlideUpLift, a presentation platform trusted by more than 100,000 professionals, today announced the launch of Creatos AI, an AI presentation maker built on SlideUpLift's library of more than 40,000 professionally designed presentation slides.

As AI makes it faster to generate presentation content, professionals still face a familiar challenge: producing decks that look polished, stay on brand and remain easy to edit after they are created.

[Creatos AI](#) is designed around a different starting point. Rather than relying solely on AI to generate presentation design from a blank prompt, it begins with professionally designed slides and uses AI to help users adapt the content, visuals and branding to their needs.

Users can start with presentation formats including pitch decks, roadmaps, timelines, SWOT analyses, business reviews and 30-60-90 day plans, then use AI or direct inline editing to customize the presentation.

“AI should make presentation creation faster without forcing professionals to give up good design or control over the finished deck,” said Manglam Vashisht, Founder of SlideUpLift. “With Creatos AI, we start with professionally designed presentations and use AI to help people make that design their own.

The goal is to remove the repetitive work while keeping the presentation editable, brand-ready and useful in real business workflows.”

## **Professional Design as the Starting Point**

Creatos AI is built on SlideUpLift's library of more than 40,000 professionally designed slides.

Instead of asking users to begin with an empty canvas, the platform gives them an existing presentation structure that can be adapted to a specific story, audience or business requirement.

The approach combines SlideUpLift's existing design library with AI-assisted customization, allowing professionals to spend more time shaping their message and less time rebuilding slide layouts from scratch.

## **AI and Manual Editing Work Together**

Creatos AI allows users to move between AI-assisted changes and manual editing within the same presentation.

Users can ask the AI to rewrite or shorten content, replace an image, apply a brand theme, animate a slide or populate a template with content for a specific topic.

They can also directly edit individual slide elements, including text, headings, shapes, icons, images, charts, colors and layouts.

After an AI-assisted change is made, slide elements remain editable, allowing users to continue refining the presentation manually.

## **One-Click Branding and Reusable Brand Assets**

Creatos AI allows users to apply brand fonts, colors and logos across a presentation.

Logos, icons and images can also be stored in a media library and reused across future decks, helping teams maintain greater consistency when producing recurring business presentations.

## **Editable PowerPoint and Google Slides Output**

Creatos AI is designed to keep presentations usable after AI-assisted creation is complete.

Finished presentations can be exported to PowerPoint and Google Slides as editable files rather than being limited to static images or PDF output.

This allows users to continue editing presentations, collaborate with colleagues and make changes in the presentation software they already use.

## **Built for Recurring Business Presentation Work**

Creatos AI is designed for professionals who frequently build and update presentations, including consultants, marketers, product and project managers, business teams and PowerPoint users.

Typical use cases include pitch decks, project updates, business reviews, roadmaps, timelines, marketing presentations, SWOT analyses and 30-60-90 day plans.

## Availability and Pricing

Creatos AI is available now at [slideuplift.com/ai-presentation-maker](https://slideuplift.com/ai-presentation-maker). New accounts include two starter AI credits with no credit card required. Inline editing does not consume AI credits. Credits are used when the AI performs work for the user and for applicable edited-deck exports, and exact credit requirements are displayed before an AI action is confirmed.

## Built on an Established Presentation Platform

Creatos AI extends SlideUpLift's existing presentation platform and professional template library.

SlideUpLift's presentation resources are trusted by more than 100,000 professionals, giving Creatos AI an existing foundation of professionally designed presentation content and business presentation use cases.

That design foundation has also been a recurring theme in customer feedback. "The designs are fantastic, helping my PowerPoint slides pop without the need for endless tweaking or design expertise," said Melissa Ann Jackson, Senior Marketing Manager.

## About Creatos AI

Creatos AI is SlideUpLift's AI presentation editor. Built on SlideUpLift's library of more than 40,000 professionally designed slides, it combines AI-assisted editing, direct inline editing, brand customization and editable presentation output.

Users can start with an existing professional design, customize content and visuals with AI or manually, apply their brand and export their finished presentation to PowerPoint or Google Slides.

## About SlideUpLift

SlideUpLift is a presentation platform that provides professionally designed PowerPoint and Google Slides templates, AI-powered presentation tools and presentation design services for business professionals.

Its library includes more than 40,000 presentation templates, including more than 10,000 free PowerPoint templates, covering business needs such as strategy, project management, marketing, pitch decks, timelines, roadmaps, executive summaries and business reviews.

SlideUpLift's presentation resources are trusted by more than 100,000 professionals. For more information, visit [SlideUpLift.com](https://SlideUpLift.com).
