San Diego, California Sep 28, 2026 ([Issuewire.com](https://www.Issuewire.com)) - [3 Plumbing Quotes](https://3plumbingquotes.com), a free online marketplace that connects homeowners with licensed, insured local plumbers, announced today that it has expanded its coverage to 15 counties across California, Nevada, and Arizona. The expansion includes deeper coverage throughout [San Diego County](#), where the company now serves dozens of individual cities and communities down to the neighborhood level.

The service allows homeowners to submit a single request describing their plumbing job and receive quotes from up to three licensed, insured plumbers who compete for the work. Homeowners can then compare pricing, warranties, and availability side by side before deciding whether to move forward, with no cost or obligation at any step of the process.

"Homeowners typically have to call multiple plumbers individually to get a fair sense of pricing, and most never bother, which means they often accept the first quote they receive," said Travis White, Founder at 3 Plumbing Quotes. "Expanding into more counties means more homeowners across California, Nevada and Arizona can get that same side-by-side comparison in one place, without the runaround."

The newly expanded [coverage area](#) now includes Los Angeles County, Orange County, Riverside County, San Bernardino County, San Diego County, Santa Barbara County, Ventura County, Kern

County, Tulare County, Madera County, Merced County, Monterey County and Fresno County in California, along with Clark County, Nevada and Maricopa County, Arizona. Within San Diego County specifically, the company has built out dedicated coverage for cities and communities including Carlsbad, Chula Vista, Oceanside, Escondido and El Cajon, along with more than twenty additional areas, reflecting a broader push to serve homeowners at the neighborhood level rather than only by county.

The [plumbing services](#) available through the marketplace span nearly 90 categories, including drain cleaning, water heater repair and installation, leak detection, sewer repair, repiping, gas line services, and water treatment systems. Every plumber in the network is screened for active licensing, insurance, and a track record of customer reviews before becoming eligible to receive homeowner requests, and homeowners remain free to verify credentials independently before hiring.

3 Plumbing Quotes said the expansion reflects rising demand from homeowners who want to compare options before committing to a repair or installation project, particularly for larger jobs such as whole home repiping or sewer line replacement where price differences between contractors can be significant. The company noted that most homeowners using the service receive their first quote within a few hours of submitting a request, with all three quotes typically arriving within 24 hours.

Homeowners in newly covered areas can submit a request and browse available services at [3plumbingquotes.com](#). A full list of covered counties and cities is available on the company's service area page, and homeowners facing an urgent issue such as a burst pipe or active leak can submit a request directly through the company's emergency plumbing page.

3 Plumbing Quotes said it plans to continue adding coverage in additional counties and cities in the coming months as more licensed plumbers join its network.

About 3 Plumbing Quotes

3 Plumbing Quotes is a free online marketplace that connects homeowners with licensed, insured local plumbers. Homeowners submit a single request and are matched with up to three pre-screened plumbers who provide competing quotes, allowing homeowners to compare pricing, warranties, and availability before choosing who to hire. The service currently covers 15 counties across California, Nevada, and Arizona. More information is available at [3plumbingquotes.com](#).
