

75way Technologies Showcases AI Agents and Voice Platform at Ai4 Las Vegas 2026

Enterprise AI provider engages attendees at North America's largest AI conference

San Jacinto, California Sep 11, 2026 ([Issuewire.com](https://www.issuewire.com)) - 75way Technologies, a provider of enterprise artificial intelligence solutions, participated in the Ai4 Conference 2026 (4–6 August 2026) at The Venetian in Las Vegas. Ai4 2026 is America's largest applied AI conference, drawing over 12,000 attendees, 1,000+ speakers and nearly 400 exhibitors. At Booth #1555, 75way demonstrated its production-ready AI agents, generative AI tools and the Talkoo.ai voice agent platform to visitors across industries. This announcement summarises 75way's key highlights, solutions showcased, and business impact from the event.

Key highlights of 75way's Ai4 2026 presence included:

- **AI Agent Demonstrations:** Live demos of AI agent solutions for tasks such as customer support, sales lead qualification, appointment scheduling and workflow automation. These agents illustrate how routine operations can be automated and scaled.
- **Voice AI (Talkoo.ai):** Showcasing *Talkoo.ai*, 75way's white-label conversational voice AI platform for automating phone interactions. Attendees saw demos of Talkoo.ai handling customer support calls, appointment scheduling and outbound campaigns across multiple languages. The platform integrates with CRMs and business apps to drive efficiency.
- **Custom AI Applications:** Presentations of bespoke AI applications (e.g. intelligent dashboards, automated document processing, enterprise workflow tools) tailored to specific business processes. Visitors explored how these solutions can be aligned with existing IT

systems for measurable benefits.

- **Generative AI and RAG:** Engaging discussions around generative AI and retrieval-augmented generation (RAG). 75way experts highlighted how generative models can automate content creation and how RAG systems connect AI models to trusted corporate data for knowledge assistants.
- **Industry Impact:** Focus on real-world use cases in sectors like e-commerce/retail, healthcare and logistics. 75way demonstrated AI solutions addressing challenges in these industries, reflecting Ai4's themes across healthcare, retail, finance and transportation.

The 75way booth attracted strong interest from enterprise leaders seeking practical AI strategies. **Lokesh Bansal, CEO of 75way Technologies**, said: *"Ai4 is all about moving AI from buzzword into production. We were thrilled to show how our AI agents and Talkoo.ai voice assistant can be deployed today to solve real business problems. The positive response from retail, healthcare and logistics companies confirmed that businesses are hungry for AI solutions that drive tangible results."* His comments underscore 75way's focus on real business outcomes from AI adoption.

"Businesses at the conference were particularly interested in our generative AI and RAG demos," said a 75way AI specialist. *"We showed how these technologies integrate with existing systems and data to deliver smarter customer support and knowledge discovery. It was gratifying to discuss concrete ROI cases with so many executives."*

"The energy at Ai4 was inspiring," added a 75way spokesperson. *"We fielded questions from companies across logistics, retail and healthcare – all looking to apply AI now. Our demos gave them confidence that AI can deliver benefits like faster service, cost savings and better insights."*

Ai4 Conference 2026 ran 4–6 August at The Venetian, Las Vegas. In its ninth year, the event attracted delegates from over 100 countries and featured a record turnout. Notable AI leaders (Geoffrey Hinton, Fei-Fei Li, Andrew Ng, etc.) spoke on topics including responsible AI and digital transformation. 75way's participation underscored its role as an **AI innovation partner** for global enterprises.

Next Steps / Call to Action: 75way Technologies invites businesses to explore its AI solutions and expertise. FAQs:

- *What is the Ai4 Conference?* Ai4 Conference is North America's largest applied AI conference. The 2026 event took place 4–6 August in Las Vegas and hosted over 12,000 AI leaders and 400 exhibitors.
- *Why did 75way attend Ai4 2026?* 75way participated to showcase its practical AI solutions (agents, voice AI, etc.) and to connect with enterprise decision-makers exploring AI deployment. Its booth highlighted real-world AI use cases.
- *What did 75way demonstrate at the conference?* The company demonstrated intelligent AI agent platforms for support and automation, its Talkoo.ai voice AI platform for call handling, and custom AI applications tailored to business workflows. Generative AI and RAG technologies were also featured in discussions.
- *What is Talkoo.ai?* Talkoo.ai is 75way's white-label voice AI platform that enables automated, human-like phone conversations for tasks like customer support, scheduling, and outbound campaigns.
- *Which industries can benefit from 75way's AI solutions?* 75way's technology applies across many sectors. For example, retailers and e-commerce companies can use AI agents for personalised shopping support; healthcare organisations can apply AI for patient data management; logistics firms can deploy AI for supply-chain optimization. In each case, 75way's solutions aim to improve efficiency, customer experience and decision-making.

Showcased Solutions vs Business Benefits:

Showcased Solution Business Benefit

AI Agent Platforms (customer support, sales, scheduling) Automates routine tasks and workflows, improving efficiency and scaling support services.

Voice AI (Talkoo.ai) Enables faster, human-like phone interactions for support and sales, reducing call-center costs and improving customer satisfaction.

Custom AI Applications (dashboards, automation tools) Tailored to business needs; streamlines complex processes and provides actionable insights from data.

Generative AI Automates content creation and data analysis, boosting productivity (e.g. auto-generated reports, summaries).

Retrieval-Augmented Generation (RAG) Connects AI to enterprise data for accurate knowledge retrieval, enabling intelligent assistants and informed decision-making.

White-Label AI Solutions Accelerates time-to-market for AI products; allows branding and customization of proven AI platforms to quickly meet business goals.
