

Actuvi Partners With GoHealthcare Practice Solutions to Bring RTM to its MSO and 180 Clinics

The partnership allows GoHealthcare to optimize RTM for their clients through an active partnership with Actuvi, streamlining implementations, operations, and billing, ensuring a higher success rate for all clients.

Dallas, Texas Sep 22, 2026 ([Issuewire.com](https://www.issuewire.com)) - Actuvi and GoHealthcare Practice Solutions have partnered to bring remote therapeutic monitoring (RTM) to its MSO and 180 specialty clinics, streamlining implementation, operations, and billing across every client practice. Client practices can now offer RTM programs on the Actuvi platform.

Since CMS introduced dedicated billing codes for remote therapeutic monitoring in 2022, adoption has moved fast. Medicare claims for RTM rose from 59,040 services in the first year to [roughly 547,000 in 2024](#), and are on pace to cross one million by the end of this year. Actuvi has grown rapidly alongside the RTM market.

[More than 100 million Americans](#) live with chronic pain and musculoskeletal conditions. Patients who engage consistently with remote therapeutic monitoring on the Actuvi platform are [5.2 times more likely](#) to reach a major improvement milestone. This partnership enables GoHealthcare's client practices to deliver those improved outcomes to their patients.

"Actuvi is built to keep care local, even digitally. With this partnership between Actuvi and GoHealthcare, we're able to streamline and simplify it for local practitioners and clinics," said Reagan Smith, CEO of Actuvi.

Under the partnership, GoHealthcare Practice Solutions will make the Actuvi platform available to its network of 180 clinics across musculoskeletal specialties.

"Our clients can now offer RTM programs that are simple to launch, easy to run, and built to scale," said Pinky Maniri, Founder and CEO of GoHealthcare Practice Solutions.

About Actuvi

Actuvi is an award-winning remote therapeutic monitoring (RTM) and digital health delivery platform that helps clinics care for patients between visits. Practices interested in offering remote therapeutic monitoring through Actuvi can learn more at actuvi.com.
