

BizMatrix.ai Acquires MediaPub.live... The Internet Has Officially Been Put on Notice

BizMatrix.ai, a company focused on building, acquiring and scaling digital businesses with proprietary AI technology, has acquired MediaPub.live, adding the digital media company to its growing portfolio of AI-powered brands.

Scottsdale, Arizona Sep 23, 2026 ([Issuewire.com](https://www.issuewire.com)) - Somewhere between “traditional media” and “artificial intelligence,” something interesting just happened.

BizMatrix.ai, a company focused on building, acquiring and scaling digital businesses with proprietary **AI technology**, has acquired **MediaPub.live**, adding the digital media company to its growing portfolio of **AI-powered brands**.

Why MediaPub?

Although AI is incredibly smart, somebody still has to give it something worth talking about.

The acquisition brings MediaPub’s entertainment and media capabilities together with BizMatrix.ai’s AI-powered tools, agents and analytics. The goal is simple: **create better content, get it in front of more people, understand what those people actually want, and find smarter ways to turn**

attention into opportunity.

You know. That part of the Internet everyone has been trying to figure out since the Internet was invented.

The transaction will also utilize **AssetLedger.ai**, BizMatrix's **Web3 platform** designed to support tokenized transactions, ownership transfers and governance. Essentially, BizMatrix is bringing AI and blockchain into the deal while the Writers are still trying to remember our passwords.

"MediaPub is a great addition to our portfolio," said **Jonathan Bonghi, CEO of BizMatrix.ai**. "Integrating our AI tools with MediaPub will help drive smarter content distribution, audience engagement and monetization."

Brad Weisman, owner of MediaPub, said the acquisition represents a major step toward harnessing AI to scale media and reach audiences in ways that were previously difficult to achieve.

And that may be the real story here.

MediaPub brings the media. BizMatrix brings the AI. AssetLedger brings the technology to help put it all together.

What happens next?

Well, we're about to find out.

And if the algorithms have anything to say about it, you're going to see it whether you want to or not. Democracy may be optional, but targeted content is not.

About BizMatrix.ai
