

Cook Vision Therapy Center Celebrates National Milestone in Augmented Reality Care

We didn't just recently jump on the augmented reality trend—we helped pioneer it.

Marietta, Georgia Sep 14, 2026 ([IssueWire.com](https://www.IssueWire.com)) - While many advanced vision therapy clinics utilize standard computer orthoptics platforms, Cook Vision Therapy Center has long held a premier position in cutting-edge care. In 2022, Cook Vision Therapy Center was one of the very first practices in the entire nation to adopt the advanced [VTS4-HoloLens AR \(Augmented Reality\) system](#).

By seamlessly combining the foundational diagnostic power of the VTS4 with the immersive, real-time tracking of the HoloLens AR headset, Cook Vision Therapy Center provides an unmatched level of precision for neuro-optometric rehabilitation and developmental vision care in Georgia.

Longevity in Innovation: Experience the Difference

We didn't just recently jump on the augmented reality trend—we helped pioneer it.

- **The National Advantage:** As an early national adopter back in 2022, our clinical team has years of direct experience leveraging 3D holographic environments to fast-track visual recovery.
- **Integrated Screen-Free Training:** While standard offices rely solely on flat, 2D screen-based VTS4 exercises, Cook Vision Therapy Center offers the fully integrated setup that takes therapy off the screen and into a true three-dimensional world.

Retraining the Brain and Eyes with True 3D Holograms

The integration of the HoloLens headset forces the brain to correctly use both eyes together in real-time. Patients interact with vibrant, color holograms floating in space, making treatment highly engaging and uniquely effective for conditions such as [strabismus \(crossed eyes\)](#), [amblyopia \(lazy eye\)](#), [convergence insufficiency](#), and [concussion or traumatic brain injury \(TBI\) recovery](#).

Trust the practice that brought advanced AR vision care to the community first. Contact Cook Vision Therapy Center in Marietta today to schedule your advanced evaluation.
